Subject Matter

Access to dataset for factual error review

Question

When an ESG rating provider notifies an issuer or rated item for the purposes of a fact-checking review, is access to the respective dataset granted only upon request?

ESMA Answer

10-07-2026

Original language

ESG rating providers are required to grant access to the dataset upon request of the issuer or rated item, in which case it should be granted as soon as possible. Alternatively, access to the dataset can be provided automatically, in parallel with the notification.

Topic

48-hour rule

Subject Matter

Scope of two working day notification period

Question

Do the two full working days encompass the notification to the rated item, the submission of a request for access to the information and the fact-checking review?

ESMA Answer

10-07-2026

Original language

No. The two full working days encompass the notification to the rated item and the submission of the request for access to the dataset for fact-checking purposes. Any extension of the time period beyond two working days for the purpose of the fact-checking review is at the discretion of the ESG rating provider. Once the minimum period of two full working days has elapsed, the provider may proceed with the issuance of the rating without being required to await comments or confirmation from the rated item or issuer.

Level 1 Regulation

ESGR - Regulation (EU) 2024/3005

Topic

Separation of business and activities

Subject Matter

Consulting activities to investors or undertakings

Question

What type of consulting activities are relevant for the purposes of the separation of business set out in Article 16(1)(a)?

ESMA Answer

10-07-2026

Original language

The type of consulting activities that would require a separation of business vis-à-vis ESG rating activities encompass advisory services that may affect the independence and impartiality of ESG ratings issued and published or distributed by the ESG rating provider.

For example, helping clients improve their ESG rating by advising on sustainability disclosures, KPIs or sustainability strategies.

At the same time, advisory activities distant to ESG ratings should not be regarded as a service justifying a legal separation from ESG rating activities in the context of Article 16(1)(a). For instance, tax and accounting advisory, such as recommending tax-efficient structures.

Additional Legal Reference

Commission Delegated Regulation (EU) 2025/1155 of 12 June 2025

Subject Matter

Consolidated Tape Provider (CTP)

Question

Does the timestamp of the order referred to in Article 3(2) of Commission Delegated Regulation (EU) 2025/1155 refer to the timestamp of the order reception in the system's gateway or the timestamp that the matcher applies when the order is registered in the order book?

ESMA Answer

10-07-2026

Original language

For the purposes of Article 3(2) of Commission Delegated Regulation (EU) 2025/1155, the “timestamp of the order” should be understood as the timestamp corresponding to the moment the order is registered in the trading venue's system in a manner that determines its sequencing and potential execution.

Consequently, under Article 3(2) of Commission Delegated Regulation (EU) 2025/1155, the relevant timestamp is the one applied at the moment of book registration, i.e. the timestamp generated by the venue's matching engine.

MiCA

Topic

Crypto-Asset Service Provider (CASP)

Subject Matter

Crypto-Asset lending services under MiCA

Question

Can CASPs offer crypto-asset lending services under MiCA, and if so, under which conditions, in particular with respect to the use of clients' crypto-assets?

ESMA Answer

18-06-2026

Original language

Yes.¹

MiCA does not address the lending and borrowing of crypto-assets (Recital 94). However, CASPs offering such unregulated services should follow the [ESMA Statement on avoiding misperceptions: Guidance for crypto-asset service providers offering unregulated services](#).

In addition, CASPs offering lending services remain subject to their general obligations under MiCA, including acting honestly, fairly and professionally in the best interests of clients,² and ensuring all communications – including marketing - are fair, clear and not misleading.³ In particular, they should avoid confusing clients when offering lending alongside regulated services.

Crypto-asset lending entails significant risks such as counterparty risk, collateral shortfall risk and the risk to lose access to lent crypto-assets if the CASP fails. Safeguarding arrangements under MiCA will also not apply to assets used in lending programmes. Such risks should thus be disclosed in a fair, clear and non-misleading way by CASPs offering crypto-asset lending services to their clients. CASPs should also ensure adequate collateral and assess the robustness of lending arrangements or protocols, including decentralised ones.

Where CASPs hold clients' crypto-assets or their means of access, they must safeguard ownership rights and not use those assets for their own account. ⁴

This requires that the use of clients' crypto-assets for lending requires prior express and specific consent, limited to clearly defined terms. Consent embedded in general terms and conditions, without prominence, would not meet this standard.

This also means that revenues generated from lending should accrue to the client, as they bear the associated risks. Apart from a fair and proportionate fee reflecting operational costs, retaining additional revenues would not be consistent with acting in the client's best interests.

This Q&A is without prejudice to any case-by-case classification. Certain lending arrangements could fall within EU or national frameworks (e.g. AIFMD), depending on their features. For example, depending on their specific features and contractual terms, certain lending arrangements could meet the definition of an alternative investment fund under the AIFMD.⁵

1.This Q&A addresses solely the lending of crypto-assets and does not cover the lending of securities, which may be subject to separate authorisation requirements.

2.Article 66(1) of MiCA⁶

3.Article 66(2) of MiCA.

4.Article 70(1) of MiCA.

5.Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers and amending Directives 2003/41/EC and 2009/65/EC and Regulations (EC) No 1060/2009 and (EU) No 1095/2010.

Topic

Crypto-Asset Service Provider (CASP)

Subject Matter

Perimeter of advice under MiCA compared to MiFID II

Question

How should the perimeter of advice on crypto-assets under MiCA be understood, and to what extent is it comparable to the notion of investment advice under MiFID II?

In particular, do introductory services – where a person recommends a crypto-asset service provider and/or a crypto-asset service to a client, without recommending specific transactions on crypto-assets – fall within the scope of advice on crypto-assets under MiCA?

ESMA Answer

18-06-2026

Original language

The perimeter of advice on crypto-assets under MiCA should be regarded as broader than the perimeter of advice under MiFID II. This is because the definition of ‘providing advice on crypto-assets’ under MiCA refers to offering, giving or agreeing to give personalised recommendations in respect of i) one or more transactions relating to crypto-assets or ii) the use of crypto-asset services.

As such, the following tests should apply:

- Does the service that is being offered constitute a recommendation?
- Is the recommendation in relation to one or more transactions relating to crypto-assets OR the use of crypto-asset services? Is the recommendation presented as suitable or based on a consideration of the person’s circumstances? Is the recommendation issued otherwise than exclusively to the public?
- Is the recommendation made to a person in his capacity as an investor or potential investor or as an agent for an investor or potential investor?

On this basis, introductory services consisting of the recommendation of a crypto-asset service to a potential investor (with or without recommending a specific crypto-asset service provider), even if not made in relation to specific transactions in crypto-assets, may be regarded as advice on crypto-assets for the purpose of MiCA, depending on the circumstances surrounding the recommendation.

To the contrary, providing solely a reference to a CASP (without further indications) equally accessible to all potential investors should not constitute a recommendation and should therefore not be regarded as advice on crypto-assets for the purpose of MiCA.

External reviewers - Registration and material changes

Subject Matter

Material changes to registration information - external reviewers

Question

What is meant by “any material changes in the information provided in accordance with Article 23(1)” of the EuGB Regulation and “any material changes to the circumstances under which the initial authorisation was granted” under Article 6(5)

of the ESGR Regulation?

ESMA Answer

22-05-2026

Original language

In line with Item 35 of ESMA's Guidelines on Periodic Information for BMAs, CRAs and MTIs, ESMA considers a "material change" to be a change that may affect the reporting entities' initial conditions of registration, notably its compliance with the requirements of the sectoral Regulation.

This also applies to Article 24(1) of the EuGB Regulation and Article 6(5) of the ESGR Regulation, where "material changes" are considered to refer to significant updates or modifications to the information submitted by external reviewers or ESG rating providers as part of their application for registration or authorisation with ESMA, in accordance with the respective technical standards.

These changes are meaningful enough that they could affect ESMA's assessment of the supervised entity's compliance with the Regulation.

For example:

1. Change in legal status or ownership structure, such as:

- Merger, acquisition or spin-off involving the legal entity.
- Significant change in shareholding, especially if it reduces the entity's independence from shareholder's interests.

2. Change in key personnel or outsourcing arrangements, such as:

- Replacement of senior management responsible for analytical or assessment activities, methodologies, oversight function or internal control mechanisms.
- Change to existing or planned outsourcing arrangements.

3. Change in policies and procedures, such as:

- Material revisions to the methodologies, models or key rating assumptions used, including to the procedures for the review of ESG ratings and for the review of ESG rating methodologies.
- Material updates to policies and procedures to manage conflicts of interest, including to the measures and safeguards implemented pursuant to Article 16 of Regulation 2024/3005.

4. Geographic expansion or change in service offerings, such as:

- Opening new subsidiaries, branches or offices in other Member States or third countries.
- Offering new services, especially any potentially conflicting activities, such as the issuance and distribution of credit ratings as defined in Article 3(1), point (a), of Regulation (EC) No 1060/2009 or assurance engagements on sustainability reporting within the meaning of Directive 2013/34/EU.

5. Major institutional or legal developments, such as:

- Strenuous financial difficulties or significant changes in net turnover, balance sheet total employee numbers, for instance breaching the threshold for being categorised as a small undertaking or as a small group for the purposes of admission into the temporary regime under Article 5 of the ESGR Regulation.
- Sanctions or enforcement action by competent authorities.

Material changes to registration information - ESG rating providers

Question

What is meant by “any material changes in the information provided in accordance with Article 23(1)” of the EuGB Regulation and “any material changes to the circumstances under which the initial authorisation was granted” under Article 6(5)

of the ESGR Regulation?

ESMA Answer

22-05-2026

Original language

In line with Item 35 of ESMA's Guidelines on Periodic Information for BMAs, CRAs and MTIs, ESMA considers a "material change" to be a change that may affect the reporting entities' initial conditions of registration, notably its compliance with the requirements of the sectoral Regulation.

This also applies to Article 24(1) of the EuGB Regulation and Article 6(5) of the ESGR Regulation, where "material changes" are considered to refer to significant updates or modifications to the information submitted by external reviewers or ESG rating providers as part of their application for registration or authorisation with ESMA, in accordance with the respective technical standards.

These changes are meaningful enough that they could affect ESMA's assessment of the supervised entity's compliance with the Regulation.

For example:

1. Change in legal status or ownership structure, such as:

- Merger, acquisition or spin-off involving the legal entity.
- Significant change in shareholding, especially if it reduces the entity's independence from shareholder's interests.

2. Change in key personnel or outsourcing arrangements, such as:

- Replacement of senior management responsible for analytical or assessment activities, methodologies, oversight function or internal control mechanisms.
- Change to existing or planned outsourcing arrangements.

3. Change in policies and procedures, such as:

- Material revisions to the methodologies, models or key rating assumptions used, including to the procedures for the review of ESG ratings and for the review of ESG rating methodologies.
- Material updates to policies and procedures to manage conflicts of interest, including to the measures and safeguards implemented pursuant to Article 16 of Regulation 2024/3005.

4. Geographic expansion or change in service offerings, such as:

- Opening new subsidiaries, branches or offices in other Member States or third countries.
- Offering new services, especially any potentially conflicting activities, such as the issuance and distribution of credit ratings as defined in Article 3(1), point (a), of Regulation (EC) No 1060/2009 or assurance engagements on sustainability reporting within the meaning of Directive 2013/34/EU.

5. Major institutional or legal developments, such as:

- Strenuous financial difficulties or significant changes in net turnover, balance sheet total employee numbers, for instance breaching the threshold for being

categorised as a small undertaking or as a small group for the purposes of admission into the temporary regime under Article 5 of the ESGR Regulation.

- Sanctions or enforcement action by competent authorities.

Subject Matter

ESG rating providers established after date of entry into force

Question

Which ESG rating providers established after the date of entry into force of Regulation (EU) 2024/3005 can benefit from the transitional regime under Article 51?

ESMA Answer

22-05-2026

Original language

An ESG rating provider established after 1 January 2025 can benefit from the transitional regime if it is a successor with structural links to an entity that had been operating in the Union at entry into force, whether or not that entity was established inside or outside the Union at that time. Examples of structural links include a subsidiary, affiliate, shared trading name, intellectual property, beneficial ownership or controlling interests.

If an ESG rating provider has no such structural links, it must apply to operate in the Union through one of the options set out in Article 4 (authorisation, equivalence, endorsement, recognition) or, if applicable, notify ESMA in order to be registered under the temporary regime for small ESG rating providers pursuant to Article 5(1).

Topic

Application to operate in the Union

Subject Matter

Transitional provisions

Question

In advance of the date of application of the Regulation on 2 July 2026, what are the different registration pathways for ESG rating providers?

ESMA Answer

22-05-2026

Original language

The Regulation provides several different routes to registration for ESG rating providers intending to operate in the Union.

For small ESG rating providers within the meaning of Article 5(1):

- Those operating in the Union at the date of entry into force of the Regulation have until 2 November to notify ESMA to be included in the Article 14 register and should, ideally, notify ESMA by 2 September. If no notification takes place, they must cease their activities,
- Those who started their operations after the date of entry into force should notify ESMA from 2 July 2026 in order to be included in the Article 14 register. If no notification takes place, they must cease their activities.

For all other ESG rating providers:

- Those operating at the date of entry into force can apply for authorisation or recognition up to four months after 2 July 2026, after having first notified ESMA by 2 August 2026 that they wish to continue operating in the Union. Until ESMA decides whether to grant authorisation, they may continue their operations.

Subject Matter

Defined ranking system

Question

What practical components should an ESG rating feature to demonstrate the existence of a defined ranking system of rating categories, as required by Article 3 of Regulation (EU) 2024/3005?

ESMA Answer

22-05-2026

Original language

ESG ratings, either in the form of opinions, scores or a combination of both, express a rating provider's value judgement of a rated item and are prepared based on an established methodology and a defined ranking system of rating categories.

The defined ranking system reflects the rating provider's value judgement in an ordinal or hierarchical structure and comprises two or more pre-determined rating categories, including the minimum and maximum levels, enabling consistent comparison across rated items. The rating categories can be represented by numbers, letters, colours or other symbols.

Level 1 Regulation

Regulation (EU) 2022/2554 - The Digital Operational Resilience Act (DORA)

Topic

Other DORA topics

Subject Matter

conclusion of ICT arrangement for the purpose of tests

Question

In certain scenarios, a financial entity may enter into an arrangement with an ICT third-party service provider solely for testing purposes. These tests typically span several weeks, during which digital service is delivered through ICT systems on an

ongoing basis, however to no internal or external users. Furthermore, digital service provided by the ICT third-party service provider is not supporting any function of financial entity, and the testing process itself has no operational impact on the entity's current standing or infrastructure.

Question:

1. Is the financial entity required to notify in a timely manner about any planned contractual arrangement the competent authorities of an arrangement concluded strictly for testing purposes, if it is anticipated that—upon successful completion—the digital service will eventually support a critical or important function?
2. What is the exact date which shall be used in the register of information if the tests will be successful and the digital service will be offered to one or more internal or external users? Should this date correspond to the initial commencement of the testing phase or the formal launch of the service in the production environment?

White paper

Subject Matter

Machine-readable (XBRL) format requirement for modified white papers

Question

When a reporting entity (e.g., an issuer, offeror, or person seeking admission to trading) notifies a modification of a white paper originally submitted before the entry into application of Commission Implementing Regulation (EU) 2024/2984 on 23

December 2025, is the reporting entity required to submit the modified white paper in the machine-readable format specified in the regulation?

ESMA Answer

12-05-2026

Original language

Yes. Since the entry into application of the formatting requirements on 23 December 2025, in the case(s) where a reporting entity notifies a modified white paper, and the original white paper was notified and published prior to the requirement, the reporting entity should prepare the modified white paper in the machine-readable format.

However, this does not mean that reporting entities who notified and published a white paper prior to the entry into application of the requirement on 23 December 2025 are automatically compelled to now submit a modified white paper. This guidance only applies when a 'significant new factor' triggers the white paper modification requirement. In other words, the entry into application of the ITS does not constitute a 'significant new factor'.

Question

Under Article 2(5)(b) of Commission Delegated Regulation (EU) 2016/957 (“RTS on STORs”), should the annually conducted audit of arrangements, systems and procedures be performed by an external auditor, or would an internal audit be sufficient? How should the “internal review” mentioned alongside the audit be understood?

ESMA Answer

08-05-2026

Original language

Commission Delegated Regulation (EU) 2016/957 does not explicitly specify whether the annual audit should be external or internal. Therefore, Persons Professionally Arranging or Executing Transactions (PPAETs) and trading venues may conduct the required annual audit either internally or externally. If it is carried out internally, the audit is expected to be performed by an independent function. It is also worth noting that the reference to an internal review should be understood as a complementary exercise to the audit.

Trading status for on halt/suspended instruments

Question

Are MTFs and OTFs required to generate instrument status messages even when the instrument is already on halt / suspended by a primary exchange?

ESMA Answer

01-04-2026

Original language

The instrument status message requires the information of the Market Identifier Code (MIC). Therefore, this information is to be provided per ISIN-MIC-Currency basis.

Hence, MTFs and OTFs should generate the instrument status message whenever they halt / suspend an instrument.

Additional Legal Reference

Article 22 of MiFIR

Subject Matter

Consolidated Tape Provider (CTP)

Question

Are APAs expected to transmit regulatory data to the CTPs?

ESMA Answer

01-04-2026

Original language

Article 22a of MiFIR requires data contributors to transmit regulatory data (i.e. system?matching?order status and financial?instrument status, as defined in Article 2(1), point (36c) of MiFIR and further detailed in Commission Delegated Regulation (EU) 2025/1155) to the data centre of the CTP.

However, given that APAs do not operate any trading system and therefore cannot provide system?level or instrument?status information, the transmission of regulatory data is only anticipated to be relevant for trading venues.

Where an APA acts as a DRSP on behalf of a trading venue, the APA should transmit the regulatory data of that trading venue in its capacity as service provider. The data, however, continues to relate to, and originate from, the trading venue's trading system, not the APA's.

Articles 5, 6 and 12(1) of Commission Delegated Regulation (EU) 2025/1155

Subject Matter

Consolidated Tape Provider (CTP)

Question

For trading venues subject to the obligations in Article 12 (1) of Commission Delegated Regulation (EU) 2025/1155, which requires business clocks capable of achieving a granularity of 0.1 microseconds, would the dissemination of timestamps at this level of granularity in their existing market data feeds be considered compliant with the requirements in Articles 5 and 6 of Delegated Regulation (EU) 2025/1155 to provide timestamps to the CTPs with a less granular precision of six decimal places?

ESMA Answer

01-04-2026

Original language

The RTS 2025/1155 specifies that the timestamp fields to be transmitted to the CTP must follow the ISO 8601 date?time format with six decimal places (i.e. ss.dddddd) representing fractions of a second in microseconds, as set out in Table 1 of Annex III, where timestamps must be provided in the format YYYY?MM?DDThh:mm:ss.ddddddZ.

ESMA confirms that a data contributor will be considered compliant with the timestamp requirements of Articles 5 and 6 of Commission Delegated Regulation (EU) 2025/1155 if it transmits timestamps with at least six decimal (microsecond) digits and follows the ISO 8601 format.

Question

Do trading venues subject to an outage need to provide the consolidated tape provider with a health status message? Are they exempt from generating the input

order matching system status data?

ESMA Answer

01-04-2026

Original language

According to ESMA's Opinion on outages, as per their outage plan, trading venues should clearly identify how information on outages is communicated (for example via the trading venue website) and what information is to be included in the communication. Furthermore, NCAs should ensure that trading venues provide all market participants (i.e. not only its members and participants but also the general public) with a notice of disruption as soon as possible. This notice of disruption should occur via any means which enables the trading venue to communicate simultaneously to market participants. In any case, the notice of disruption should also be published on the trading venue's public website and include a dedicated contact line or person at the affected trading venue allowing market participants to ask questions and share information relating to the ongoing outage. As a result, when there is an outage, a trading venue should promptly communicate this information on its website and to the CTP and it would not need to separately generate the input order matching system status data.

Question

Who may benefit from the opt-in regime outlined in Article 22a(2) and (3) of MiFIR?

ESMA Answer

10-07-2026

Original language

The opt-in regime is exclusively applicable to the consolidated tape (CT) for shares and ETFs (equities CT). For the bonds and OTC derivatives CTs, all relevant data contributors are required to transmit data.

Moreover, only (i) investment firms operating an SME growth market (as defined in Article 4(1)(12) of MiFID II) and (ii) market operators (as defined in Article 4(1)(18) of MiFID II), and meeting the conditions in Article 22a(2) of MiFIR, may make use of the opt-in regime for the equities CT. Investment firms operating an MTF that does not qualify as an SME growth market may not make use of the opt-in regime and are required to contribute data to the equities CT.

Question

What status must be reported when an instrument is reported for the first time to the CTP?

ESMA Answer

01-04-2026

Original language

The initial status of individual financial instruments is reported for the first time from data contributors to the CTP in the following cases:

(i) when the activities of the CTP start (i.e. the status should be ACTV, unless the instrument is already suspended or halted); and

(ii) when an instrument is newly admitted to trading (i.e, the status should be ACTV);

In essence, the initial message establishes the baseline status that the CTP will disseminate until a subsequent change is reported. Please find below some examples:

Instrument	Publication venue	Status prior to go live T-1	CTP go live date: T	.../... other phase changes sent throughout T	T+1	T+N
ABC	MIC1	ACTV	MIC1 sends a message with Trading phase set to 'SOAU' and status set to 'ACTV'	MIC1 sends a message with Trading phase set to new values	MIC1 sends a message with Trading phase set to 'SOAU'	MIC1 sends a message with status set to 'RMOV'
	CTP	N/A	CTP sends a message with Trading phase set to 'SOAU' and status set to 'ACTV'	CTP sends a message with Trading phase set to those values and status set to 'ACTV'	CTP sends a message with Trading phase set to 'SOAU' and status set to 'ACTV'	CTP sends a message with status set to 'RMOV'

Question

At which point in time do data contributors have to submit regulatory data of individual financial instruments to the CTP, and how does the CTP handle and

publish this information?

ESMA Answer

01-04-2026

Original language

Data contributors must submit regulatory data of individual financial instruments only when there is a change in the trading status of an instrument, such as a suspension, halt, resumption or removal. Upon receiving a status update, the CTP should promptly update and disseminate the information as part of its real-time output. The CTP should continuously publish and maintain an up-to date list of all instruments admitted to trading, reflecting their most recent status.

Question

What types of transmission protocols may the CTP choose from, according to Article 22a(5) of MiFIR?

ESMA Answer

01-04-2026

Original language

The CTP may select any of the types of transmission protocols that a data contributor makes available to other data users for the dissemination of data as specified in Article 13(1) of MiFIR.

Where a data contributor has outsourced its reporting to the CTP to a third party, the CTP may likewise select from the types of transmission protocols that this third party offers to other data users for the dissemination of data as specified in Article 13(1) of MiFIR.

A data contributor should not outsource CTP reporting for the purpose of intentionally restricting the CTP's choice of transmission protocols.

Data reporting services providers

Additional Legal Reference

Article 22 of MiFIR

Subject Matter

Consolidated Tape Provider (CTP)

Question

Can a data contributor outsource data reporting to the CTP to a third party, such as another data contributor?

ESMA Answer

01-04-2026

Original language

The legal obligation to report data to the consolidated tape lies with the data contributors themselves (see Article 22a of MiFIR). While data reporting to the CTP may be outsourced – for example, from a trading venue to an APA, or from one trading venue to another – such outsourcing does not relieve the original data contributor of its legal obligations and accountabilities, including those relating to data quality.

In particular, in the light of such legal obligations, outsourcing of CTP reporting should not introduce artificial latency into the reported data, not be undertaken for the purpose of intentionally restricting the CTP's choice of transmission protocols or otherwise undermining the CTP's mission.

Level 1 Regulation

Markets in Financial Instruments Regulation (MiFIR) Regulation (EU) No 600/2014-MDP

Topic

* EMIR Reporting

Subject Matter

Reporting under Article 7d of EMIR

Question

Background

Article 7d EMIR (as amended by Regulation (EU) 2024/2987) creates an annual reporting obligation on EU clearing members and on clients that clear through a third country CCP recognised under Article 25 EMIR. Where the reporting entity is established in the Union and not part of a group under consolidated supervision in the Union, it reports to its NCA; where it belongs to a Union consolidated group, the Union parent undertaking reports on a consolidated basis to its NCA, including the information related to entities of the same group which are not established in the EU.

This requirement has given rise to questions regarding the interpretation and practical application of the reporting obligation, in particular in relation to the scope of contracts and of entities covered.

1. Scope of contracts covered by Article 7d(1) EMIR

While recital 17 of EMIR 3 specifically states that the information to be reported (under Article 7d of EMIR) should distinguish between securities transactions, derivative transactions on regulated markets and OTC derivative transactions, Article 7d(1) refers generally to “contracts” cleared at third country CCPs and to “type of financial instruments or non-financial instruments”, without further qualification or cross reference to existing EMIR or MiFID II definitions. Therefore, the provision does not specify whether the reporting obligation should cover:

- OTC derivative contracts within the meaning of Article 2(7) EMIR;
- all derivative contracts, including both OTC derivatives and exchange traded derivatives;
- specific asset classes or all financial instruments as listed in Annex I, Section C of MiFID II;
- commodities and other non-financial instruments cleared in third-country CCPs.

1. Which contracts are referred to in Article 7d(1) EMIR?

Exemption for SPO providers

Question

Can a second-party opinion provider producing and using an ESG rating for its second-party opinion, without publishing or distributing it on a standalone basis, benefit from the exemption set out in Article 2(2)(i) of Regulation (EU) 2024/3005?

ESMA Answer

18-03-2026

Original language

Answer provided by the European Commission

Article 2(2), point (i) of the ESG Rating Regulation provides that external reviews or second-party opinions on bonds marketed as environmentally sustainable, sustainability-linked bonds, and bonds, loans and other types of debt instruments marketed as sustainable are exempted from the scope of that Regulation.

External reviews or second-party opinions fall in scope of the ESG Ratings Regulation only when they contain an ESG rating issued by the external reviewer or the second-party opinion provider.

External reviews of European Green Bonds, as provided for in Regulation (EU) 2023/26311, are always outside the scope of the ESG Ratings Regulation, in accordance with Article 2(2), point (h) of that Regulation.

These provisions reflect the co-legislators' policy objective to focus the ESG Ratings Regulation on ESG ratings, defined as opinions, scores, or a combination of both, according to, Article 3(1)(2) and (3) of that Regulation. This intention is also highlighted in recital 18 of that Regulation.

If an external review or a second-party opinion includes only elements of an ESG rating, such as a methodology or a rating scale, but there is no separate opinion or a separate score, or combination of both, that can be considered to constitute an ESG rating, this is to be interpreted as meaning that the external review or second-party opinion does not include an ESG rating.

Examples of where the provider of an external review or a second-party opinion would fall in scope of the ESG Ratings Regulation include:

(i) where an external review or second-party opinion includes an opinion or a score, or a combination of both, constituting an ESG rating, and the ESG rating can be distinguished from the external review or second-party opinion, although it may be included in that opinion;

(ii) where an external review or second-party opinion is marketed or offered to clients as an ESG rating within the meaning of Article 3(1) of the ESG Ratings Regulation and

(iii) where the provider of an external review or of a second-party opinion markets its product as an external review or a second-party opinion to circumvent obligations of the ESG Ratings Regulation, but the product meets the definition of ESG rating as defined in Article 3(1) of the ESG Ratings Regulation.

In these examples, providers of the external review or second-party opinion would carry out the activity of an ESG rating provider. They would have to apply to ESMA for authorisation to operate in the Union and be subject to the applicable requirements of the ESG Ratings Regulation. The product-related requirements of that Regulation would be applicable only to the part of the external review or second-party opinion that is considered to constitute an ESG rating.

Disclaimer

The answers clarify provisions already contained in the applicable legislation. They do not extend in any way the rights and obligations deriving from such legislation nor do they introduce any additional requirements for the concerned operators and competent authorities. The answers are merely intended to assist natural or legal persons, including competent authorities and Union institutions and bodies in clarifying the application or implementation of the relevant legal provisions. Scope (including exemptions)

Subject Matter

ESG ratings used for internal purposes or in-house financial services

Question

What types of activities are considered “internal purposes” or “in-house” or “intragroup financial services or products” for the purposes of Article 2(2)(b)?

ESMA Answer

18-03-2026

Original language

Answer provided by the European Commission

The Article 2(2)(b) of the ESG Ratings Regulation foresees the exemption from the requirements of the regulation when ESG ratings issued by regulated financial undertakings are used exclusively for providing in-house or intragroup financial services or products.

An in-house activity refers to any internal use of an ESG rating by a regulated financial undertaking, provided that the rating is not published or distributed to a third party.

The ESG rating developed by a regulated financial institution and used in financial services provided intra-group is exempt from the scope of the Regulation provided it is not disclosed to any third party, either through publication or distribution. For the purposes of Article 2(2)(b), examples of “internal purposes” include the use of an ESG rating to facilitate treasury operations, risk management or internal lending processes.

Examples of “in-house or intragroup financial services or products” include where ESG ratings are issued and used for portfolio construction within the same corporate group, where one entity makes investments for the benefit of other entities in that group. A further example is the use of an ESG rating as an input to the decision to offer a financial service or product to a client or third party without the rating being disclosed.

Subject Matter

Personal recommendation and suitability statement: documentation nature and staff attribution in split/automated processes

Question

Under MiFID II, investment advice is defined as a personal recommendation to a client in relation to transactions in financial instruments. In practice, the personal recommendation, the suitability assessment, the documentation and the technical generation/transmission of the suitability statement may be performed by different persons and/or partly automated systems.

Could ESMA clarify the following points:

1. For determining whether and by whom investment advice was provided, is it primarily relevant who gave/communicated the personal recommendation to the client, rather than who merely prepared/generated/transmitted the suitability statement through IT systems?
2. Should the suitability statement under MiFID II / Delegated Regulation (EU) 2017/565 be understood as documentation and rationale of a recommendation that has already been made, rather than as a constitutive element of “investment advice”?
3. Is it necessary, for the attribution of investment advice to a specific staff member, that the same staff member is technically able to create/approve/transmit the suitability statement, or can these steps be separated without changing the attribution of who “advised”?

Subject Matter

Attribution of investment advice in split or system-supported workflows (personal recommendation vs suitability statement)

Question

In practice, investment firms may apply “tandem” or split workflows where one staff member conducts the client meeting, gathers the client’s circumstances and communicates/explains a concrete course of action to the client, while another staff member and/or a partly automated system performs the suitability assessment, approval and/or generates/transmits the suitability statement.

Against this background, could ESMA clarify, under MiFID II and relevant Level-2 measures, the EU-law criteria for determining whether the staff member who leads the client interaction and explains the recommendation is already providing investment advice, or whether that activity can be regarded as acting under supervision?

In particular:

1. For the attribution of investment advice, is the decisive element who communicates the personal recommendation to the client, rather than who technically generates/approves/transmits the suitability statement?
2. In split workflows, what organisational minimum features are expected to evidence “under supervision” (e.g. explicit assignment of the supervisory role, timely intervention capability, documented review/approval/sign-off), where the supervised staff member communicates the personal recommendation?

Updating the Loan Value and Security Price Fields following lifecycle events

Question

For securities lending and borrowing transactions, should Field 2.49 – ‘Security or Commodity Price’ and Field 2.56 – ‘Loan Value’ be updated and reported whenever

mark-to-market adjustments are agreed between counterparties?

ESMA Answer

03-03-2026

Original language

Yes, Field 2.49 – ‘Security or Commodity Price’ and Field 2.56 – ‘Loan Value’ should be updated whenever a lifecycle event occurs, including mark-to-market adjustments agreed between counterparties.

Under SFTR, ‘Cash Marks’ and ‘Fee Marks’ are considered as lifecycle events and must be reported using action type ‘MODI’. When counterparties adjust the loan value to reflect market price movements, the corresponding reports should be amended to reflect the updated values.

This is consistent with ESMA’s guidance in Table 6 of Section 4.10 (*‘Mapping business events to action types and levels’*) of the [Guidelines on reporting under SFTR](#), which identifies cash marks and fee marks (events #22 and #23) as business events which allow a MODI report.

Subject Matter

Records / audit trail / digital workflows / use of user credentials / Record-keeping and audit trail for “under supervision” in digital/segregated advisory workflows

Question

I would like to request a general clarification on the interpretation of the ESMA Guidelines ESMA/2015/1886 (rev.) regarding record-keeping requirements for “under supervision” (in particular paragraphs 19, 20(c) and 20(g)).

In practice, client communication, suitability documentation and system completion are often performed in a segregated and digital manner (e.g. different staff members involved in the client interaction, documentation and approval). This raises, in particular, the following questions:

1. Minimum requirements for records / traceability

What minimum requirements arise from the Guidelines regarding records to enable the competent authority to verify that supervision actually takes place and is carried out to an appropriate extent?

2. Objective evidence of assumption of responsibility

Is the mere formal naming of a qualified person in the documentation (e.g. in the suitability statement) sufficient, or do the Guidelines expect objectively verifiable review/approval/sign-off evidence?

3. Digital processes / segregated documentation

What requirements apply in digital systems and segregated documentation workflows where client communication, suitability documentation and system completion are not carried out by the same person?

4. Use of user credentials / role awareness

How should “under supervision” be assessed under the Guidelines if user credentials of a qualified person are used for system documentation/system completion, but that person does not provide a conscious assumption of responsibility (review/approval/sign-off) or is not aware that they are intended to act as the supervisor?

ESMA Guidelines ESMA/2015/1886 (rev.), paras. 4(j), 19, 20(c)-(g); MiFID II (Directive 2014/65/EU), Art. 16(2) and 16(6), Art. 25(1), Art. 25(2), 25(6) and 25(9); Commission Delegated Regulation (EU) 2017/565, Art. 54 and Art. 72.

Subject Matter

“Under supervision” – responsibility, role awareness, real-time supervision, sign-off / “Under supervision” in investment advice: responsibility, role assignment and supervisory sign-off

Question

I would like to request a general clarification on the interpretation of the ESMA Guidelines ESMA/2015/1886 (rev.) regarding “under supervision” in the context of investment advice, in particular paragraphs 4(j), 19 and 20(d)–(g).

In practice, investment firms use supervision/tandem models in which a supervised staff member communicates the personal recommendation to the client, while a qualified/experienced person performs supervision and carries out documentation/approval steps.

Against this background, I kindly request clarification on the following points:

1. Real-time supervision vs. ex post review

Do the Guidelines typically require that, for “under supervision”, the supervisor is able to intervene in real time (e.g. by attending, listening-in/reading along, and having an immediate stop-go capability), or can an exclusively ex post review/approval be sufficient?

2. “Under the responsibility of” / “same responsibility”

How should the requirement be understood that the activity is performed “under the

responsibility of” a qualified/experienced person (para. 4(j)) and that the supervisor assumes “the same responsibility” (para. 20(g))?

Which organisational minimum features are typically expected where the supervised staff member communicates the personal recommendation to the client?

3. Explicit assignment and awareness of the supervisory role

Does “under supervision” require that the supervisory role is explicitly assigned and that both the supervised staff member and the supervisor are aware of their respective role, responsibilities and limits?

4. Conscious assumption of responsibility / sign-off

Is the signing of the suitability statement by the supervisor mentioned in para. 20(g) to be understood as a standard expectation (or, in digital processes, a functional equivalent such as a documented review/approval/sign-off)?

Is the mere presence of a qualified person without a conscious assumption of responsibility sufficient?

Regulation 2017/565 - MiFID II Delegated Regulation

Topic

Remuneration

Subject Matter

MiFID II remuneration rules applicable to tied agents

Question

1. Does a tied agent have to be remunerated with both a variable component of remuneration (based on the actual activities performed by the tied agent, i.e., dependent on performance) and a fixed component of remuneration, as stipulated in Article 27 of Regulation (EU) 2017/565?

2. Would the answer to the first question change if the tied agent is engaged by a person falling under Article 3 of the MiFID II Directive, i.e., assuming that a Member State adopts this optional exemption under Article 3 of the MiFID II Directive and incorporates it into its national legislation?

ESMA Answer

23-02-2026

Original language

1. Tied agents of investment firms are in scope of the definition of “relevant persons” of Article 2(1) of Delegated Regulation 2017/565 and, as such, the requirement in the second subparagraph of Article 27(4) of the same regulation to maintain for relevant persons a balance between fixed and variable remuneration also applies to them.?

Recital 41 of Delegated Regulation 2017/565 confirms that “*Relevant persons should also include tied agents.*” However, it introduces some flexibility in the application of the remuneration requirements applicable to “relevant persons” due to tied agents’ special status and national specificities applicable to it: “*When determining the remuneration for tied agents, firms should take the tied agents’ special status and the respective national specificities into consideration. However, in such cases, firms’ remuneration policies and practices should still define*

appropriate criteria to be used to assess the performance of relevant persons, including qualitative criteria encouraging the relevant persons to act in the best interests of the client."

This recital should be understood as permitting the variable remuneration of tied agents of investment firms to represent a larger part of the remuneration than other categories of relevant persons, while the fixed component, when compatible with national laws, remains sufficient to ensure that the interests of the investment firm or its relevant persons are not favoured to the detriment of the interests of clients.

2. While ESMA acknowledges that the implementation of the exemption under Article 3 of MiFID II is a national discretion, it notes that Member States making use of this exemption shall submit the "exempted" persons to requirements which are at least analogous with the requirement in paragraph 2 which includes the requirements on remuneration of tied agents under Article 27 of Regulation (EU) 2017/565.

Article 7a(3)

Subject Matter

AAR stress testing

Question

In accordance with Article 7a(4) of EMIR, the AAR requirements set out under points (a), (b), and (c) of Article 7a(3) shall be “regularly stress-tested at least once a year”. In relation to the stress-testing referred to under Article 7a(4) of EMIR:

- Should the stress testing apply to three times the trade count or to the gross notional value cleared?
- Should the stress testing apply for each type of products under Article 6 of Commission Delegated Regulation (EU) 2026/305, or at subcategories or account level ?
- What is the timeline for the first annual stress test?

ESMA Answer

27-02-2026

Original language

In accordance with Article 7a(4) of EMIR, the AAR operational requirements should be "stress-tested at least once a year". Accordingly, Article 3(2) of Commission Delegated Regulation (EU) 2026/305 requires the tests to take place annually.

On this basis, it is understood that the active accounts should be stress tested for the first time no later than one year following the entry into application of the active account requirement, hence before 24 June 2026.

The first reporting including the results of these stress tests is expected in July 2026.

Furthermore, Article 2 of Commission Delegated Regulation (EU) 2026/305 clearly specifies that stress testing must consider a three-fold increase of the gross notional

value cleared respectively:

- By the CCP (point (c) of Article 2(1) of Commission Delegated Regulation (EU) 2026/305)
- In the active account by the counterparty (point (d) of Article 2(1) of Commission Delegated Regulation (EU) 2026/305)

Finally, Article 2(1)(d) of Commission Delegated Regulation (EU) 2026/305 further requires demonstrating that the counterparty or clearing service provider has the operational capacity to clear up to *“three times the gross notional value cleared in the account by the counterparty”*.

It is therefore understood that where a counterparty has three different accounts (e.g. for EUR OTC IRD, PLN OTC IRD and EUR STIR), the three accounts should be stress tested separately.

Article 7a

Subject Matter

AAR representativeness obligation

Question

When and how should a counterparty comply with the representativeness obligation and subsequent reporting when it reaches the EUR 6 billion threshold for the first time?

ESMA Answer

27-02-2026

Original language

Counterparties must monitor their positions on a continuous basis against the relevant thresholds. Therefore, a counterparty subject to the AAR becomes subject to the representativeness obligation as soon as it reaches the EUR 6 billion threshold in the relevant categories referred to in Article 7a(6) of EMIR.

As a result, the first reporting is expected to be submitted at the next reporting date (either January or July, whichever is sooner).

However, it is recognised that full compliance with the representativeness obligation (i.e. clearing 5 trades on a yearly average in the account) can only be demonstrated once a complete year has passed.

Topic

EU-CCPs

Additional Legal Reference

Article 7a

Subject Matter

AAR representativeness obligation

Question

Are counterparties immediately relieved from the representativeness obligation, including reporting, when they no longer meet the EUR 6 billion threshold set out under Article 7a(4) of EMIR?

ESMA Answer

27-02-2026

Original language

The representativeness obligation, including reporting, ceases to apply as soon as a counterparty no longer meets the EUR 6 billion threshold set out under Article 7a(4) of EMIR.

However, to enable NCAs to verify compliance, a counterparty must still submit the reporting covering the last period during which it was subject to the representativeness obligation.

Counterparties must keep monitoring their positions on a continuous basis against the relevant thresholds.

Guidelines on Alternative Performance Measures

Topic

Alternative Performance Measures (APM)

Subject Matter

Interaction of the APM Guidelines with IFRS 18 Presentation and Disclosure in Financial Statements; APM Guidelines and paragraphs 117 to 125 of IFRS 18

Question

How should an issuer present alternative performance measures in light of the IFRS 18 Presentation and Disclosures in Financial Statements? Which are the main differences between the scope and requirements of the APM Guidelines and IFRS 18?

ESMA Answer

16-02-2026

Original language

While it is expected that IFRS 18 impacts primarily the financial statements of issuers, this Q&A focuses solely on the interaction between the IFRS 18 requirements and the ESMA Guidelines on Alternative Performance Measures (APM Guidelines). In particular, it provides insights into the main differences in concepts, scope and principles between 'Management-defined Performance Measures (MPMs)' under IFRS 18 and alternative performance measures (APMs) as defined in the APM Guidelines. This Q&A also provides guidance on how issuers may ensure compliance with the APM Guidelines in light of the new requirements introduced by IFRS 18 **(effective on 1 January 2027)**.

ESMA notes that the APM Guidelines are still fit for purpose and will continue to fully apply after IFRS 18 enters into force. In the following sections, ESMA highlights the most relevant similarities and differences that issuers should take into account when complying with the APM Guidelines, considering the requirements arising from IFRS 18.

1.1. Measure location (where the measures are disclosed):

ESMA highlights that the application scope of the APM Guidelines and IFRS 18 requirements is different:

- **The APM Guidelines** apply to regulated information[1] (e.g. ad-hoc disclosures published under Article 17 of MAR[2] and management reports published pursuant to the Transparency Directive) and prospectuses drawn up in accordance with the Prospectus Regulation[3].
- **IFRS 18** requires issuers to disclose, inside the financial statements, subtotals of income and expenses that are, among other criteria[4], used in public communications.

The concept of public communications included in IFRS 18 is generally broader than the scope of application of the APM Guidelines, as it may also include measures contained in documents that are not covered by MAR, TD or PR[5] (e.g. websites of the issuer and other communication documents) [6]. Hence, when assessing the application of IFRS 18 and its interaction with the APM Guidelines, issuers may need to consider if all measures used in the different communication documents meet the definition of an MPM.

The following flow-chart illustrates the different compliance scenarios that apply based on the location[7] of the measure:

¹ Exclude written transcripts of oral communications and social media posts (paragraph B119 of IFRS 18)

* MPMs as defined in paragraph 117 of IFRS 18

1.2. Definition of APM vs MPM

Both IFRS 18 as well as the APM Guidelines include broad definitions of APMs and MPMs. These definitions are intended to capture a broad range of measures that are (i) in the case of IFRS 18, not specifically required to be presented or defined by

IFRS Accounting Standards; and (ii) in the case of the APM Guidelines, not defined or specified by the applicable financial reporting framework or by any other legislation. ESMA highlights, however, the following:

APMs under the APM Guidelines

MPMs under IFRS 18

The APM Guidelines apply to measures calculated based on figures determined by any financial reporting framework, including national GAAPs and IFRS. They cover performance, position, and cash-flow measures (e.g. ratios, net debt, segment data) that:

- are not defined or specified in the applicable financial framework or other legislation,
- are presented outside the financial statements, and
- are disclosed within regulated information documents and/or prospectuses.

IFRS 18 defines MPMs as a subtotal of income and expenses that is used to communicate to investors management's view of an aspect of the financial performance of the company **as whole** and it is **not listed in IFRS 18** or **specifically required** by IFRSs.

These may include measures that are presented on the face of the statement of the profit or loss.

Based on the above types of measures covered, generally MPMs represent a subset of APMs as defined by the APM Guidelines. When assessing which principles and requirements are applicable, issuers should verify where the performance measure is disclosed and whether it meets the definitions of MPMs and/or APMs. Depending on this assessment, issuers may need to assess where

the applicable disclosures should be included. Notably:

1. if measures are MPMs but are not disclosed within regulated information documents, all the applicable disclosures **should be included inside financial statements** as required by IFRS 18 (in a single note), or
2. if measures are MPMs, fall within the scope of the definition of an APM and are included in regulated information documents and/or prospectus, the principles of the APM Guidelines and IFRS 18 apply. **Please refer to section 1.3 of this Q&A and to [Q&A #1868 on the APM Guidelines](#), regarding the location of the applicable disclosures and other principles, or**
3. if measures fall within the definition of an APM pursuant to the APM Guidelines, are disclosed in documents under the scope of the APM Guidelines and are not MPMs - the applicable disclosures should be provided **outside financial statements**.

Finally, ESMA notes that **IFRS 18 does not define ‘earnings before interest, tax, depreciation and amortisation’ (EBITDA)**. However, the Standard specifically lists ‘operating profit or loss before depreciation, amortisation and impairments’ within the scope of IAS 36’ (OPDAI) which may provide similar information to many of the EBITDA measures currently used. Therefore, if EBITDA does not accurately describe the corresponding measure (e.g., an issuer, applying classification requirements of IFRS 18 correctly, has no income and expenses in the investing category and no interest income in the operating category)[8], this measure is both MPM and APM and issuers should comply with the relevant principles in IFRS 18 and the APM Guidelines.

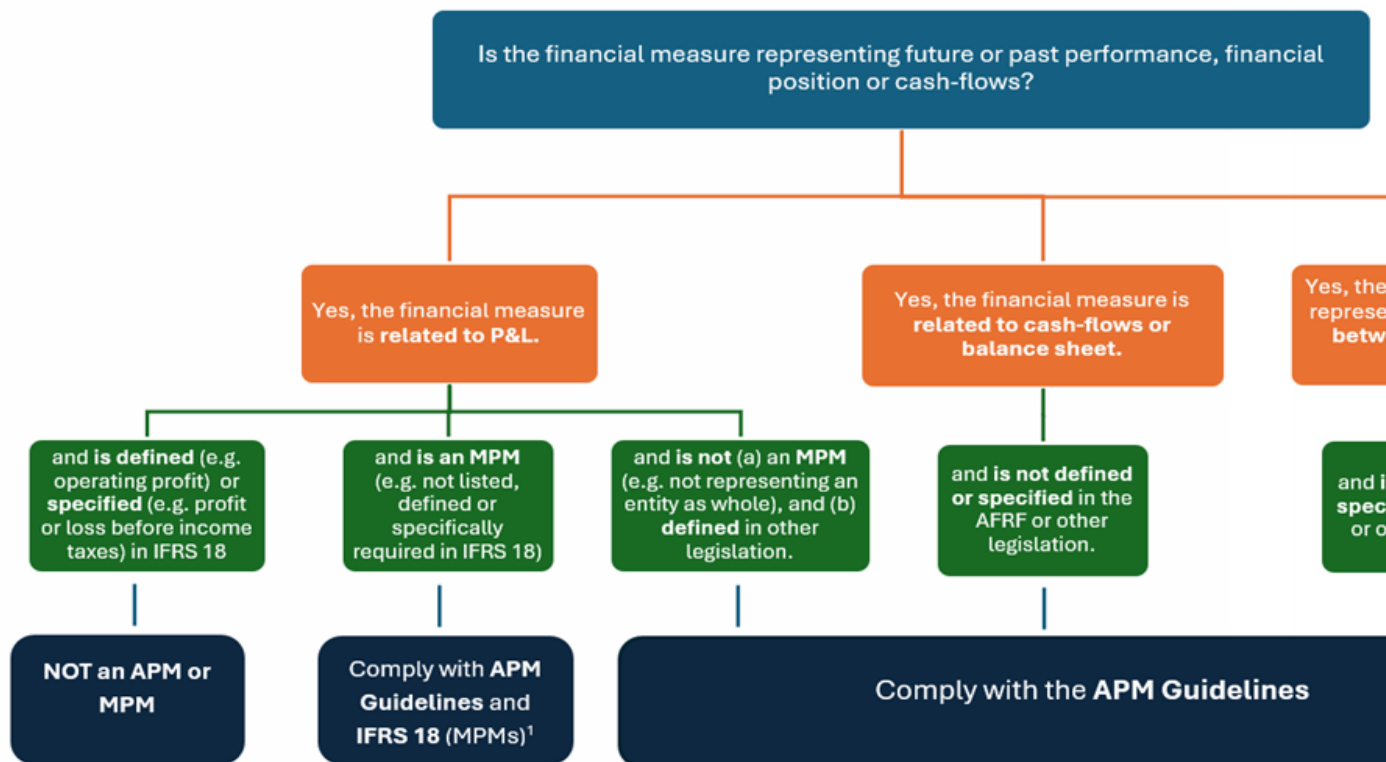

1.2.1 Measures specified (listed) in IFRS 18

Subtotals of income and expenses that are specifically required to be presented or disclosed by IFRS Accounting Standards as well as those listed in paragraph 118 or

B123 of IFRS 18 do not meet the definition of an MPM. Generally, these measures also do not fall within the scope of the APM Guidelines as they are defined or specified in the applicable financial reporting framework (i.e., IFRS Accounting Standards). Totals and subtotals specified by IFRS 18 (i.e. not meeting the definition of MPMs and APMs) include: operating profit, profit before financing and income taxes, operating profit or loss and all income and expenses classified in the investing category, profit or loss before income taxes, profit or loss from continuing operations.

Issuers should, however, be cautious as **any deviation from** the application of IFRS 18 requirements regarding the calculation of such measures (e.g. excluding or including any expenses or income items that are not in line with paragraphs 118 or B123 of IFRS 18) may lead to the application of the APM Guidelines (if these measures are presented outside financial statements and within regulated information documents or prospectuses).

The following flow-chart illustrates different scenarios where the financial measure may be in the scope (definitions) of the APM Guidelines only, IFRS 18 only or both:

¹ Please refer to section 1.3 of this Q&A

*AFRF- the Applicable Financial Reporting Framework

*MPMs as defined in paragraph 117 of IFRS 18

1.3. Application of the APM Guidelines to MPMs (What to disclose)

ESMA acknowledges that the principles included in IFRS 18 requiring additional disclosure of information in relation to MPMs are generally consistent with the principles included in the APM Guidelines requiring additional disclosure of information in the context of APMs. Therefore, it is not expected that the introduction of IFRS 18 will increase the reporting burden related to the measures that are currently in scope of the APM Guidelines. However, ESMA highlights key differences to consider:

1. **Timing:** IFRS 18 requires issuers to disclose information such as reconciliations, explanations, definitions concerning MPMs in IFRS financial statements when the financial statements are published. Conversely, the APM Guidelines require similar disclosures when these measures are disclosed to the public, i.e., the disclosures required by the APM Guidelines **should generally be provided at the same time and in the same document where the APM is disclosed** (regulated information documents and/or prospectuses). Please refer to **d)** below regarding compliance by reference principle.
2. **Reconciliations:** the principles included in the APM Guidelines **do not require** the disclosure of the income tax effect and the effect on non-controlling interests for each item included in the reconciliation between APMs and figures included inside financial statements. IFRS 18 requires such disclosure when a given measure meets the definition of an MPM. Furthermore, IFRS 18 requires a reconciliation between the MPM and the most directly comparable subtotal listed in paragraph 118 or total or subtotal specifically required to be presented or disclosed by IFRS. While this requirement is not fully aligned with the principle included in the APM Guidelines in paragraph 26, if issuers apply the reconciliation requirements in IFRS 18, they will also comply with the reconciliation requirements in the APM Guidelines.
3. **Prominence:** According to the APM Guidelines, APMs should not be displayed with more prominence, emphasis or authority than measures directly stemming from financial statements. Considering IFRS 18's entry into force and the new concept of MPMs (which requires certain information to be included in the notes to IFRS Financial Statements), ESMA highlights that issuers **should not display any APMs** (including measures that meet the definition of an MPM) with more prominence, emphasis or authority **than**

measures defined or specifically required by IFRS. I.e., if issuers disclose APMs (including MPMs) in regulated information documents and prospectuses, issuers should also include in these documents, measures defined by IFRS with, at least, equal prominence.

4. **Compliance by reference:** while IFRS 18 requires issuers to disclose all information on MPMs in one note to the financial statements, the APM Guidelines do not set specific requirements as to where and how such disclosures should be provided, allowing issuers to comply by reference^[9] (i.e., issuers are not required to include all the information prescribed in the APM Guidelines in the same document where an APM is disclosed provided that the **issuer includes a direct reference to other documents previously published** which contain this information and are readily and easily accessible to users).

Where APMs are simultaneously MPMs, issuers may use the compliance by reference principle to direct users to the information included in a specific note to the published IFRS financial statements (where these disclosures - e.g. reconciliations, explanations - are included). This procedure may avoid repetition of (some of) the information (i.e. issuers may not need to disclose twice the same information e.g. in the financial statements and in the regulated information documents). However, ESMA notes that there are limits for the compliance by reference, in this respect, please refer to [Q&A #1876 on the APM Guidelines](#).

Finally, ESMA notes that prospectuses are covered by a separate regime for incorporation by reference as provided under Article 19 of Regulation (EU) 2017/1129, which includes a specific list of the types of documents (which includes financial statements) from which information can be incorporated by reference into a prospectus.

To the extent that the relevant disclosures (e.g., reconciliations and explanations) are included in a document from which information can be incorporated by reference into a prospectus, ESMA considers that this information should be incorporated by reference into the issuer's prospectus in accordance with Article 19.

[1] As defined in Article 2 (k) of Directive 2004/109/EC of the European Parliament and of the Council of 15 December 2004 on the harmonisation of transparency requirements in relation to information about issuers whose securities are admitted to trading on a regulated market (Transparency Directive or TD).

[2] Regulation (EU) No 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse (Market Abuse Regulation or MAR).

[3] Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC (Prospectus Regulation)

[4] See paragraph 117 of IFRS 18 for further div.

[5] See paragraphs B119 – B122 of IFRS 18 for further div.

[6] Please note that measures disclosed in social media posts are outside the scope of IFRS 18.

[7] This flow-chart does not address the differences in the definitions of APM & MPM (please refer section 1.2).

[8] See paragraphs BC363-365 of Basis for Conclusions on IFRS 18.

[9] Where compliance by reference is permitted or possible (Paragraph 45 of the APM Guidelines).

Guidelines on performance fees in UCITS and certain types of AIFs - 05/11/2020 | ESMA34- 39-992 EN - paragraph 29

Subject Matter

interpretation of the condition "... as long as this would be in the investor's best interest (i.e. it would result in the investor paying less fees)."

Question

May I ask you for further clarification of your answer to ESMA_QA_774.

Q1 :

The example in your answer shows the very specific example of deducting the performance fee from excess performance before calculating the performance fee. The example is not the normal calculation described in the first bullet point where the performance fee is not deducted from excess performance for calculating the performance fee. Correct?

Q2:

The normal calculation described in the first bullet point where the performance fee is not deducted from excess performance for calculating the performance fee means that also a possible performance fee accrued until the day before (D-1) is not deducted from excess performance because otherwise the mathematical incorrectness which I described in my question still exists for the current performance fee calculation period

(usually the fiscal year of the fund) with the false result just not including the false effect for the day of calculation (D). Correct?

Q3

In your answer you formulated the example where the performance fee is deducted from excess performance

for the calculation of the performance fee as follows:

EXAMPLE: According to the prospectus, the Management Company will receive a performance fee, equivalent to 9% of the positive net earnings of the fund.

However, as you showed in your mathematical expression the actual, resulting performance fee is not 9% but

8,26%. As I mentioned in my question normal business as well as legal understanding of "x% of something"

always means that the result of x% is not deducted from the something before calculating the "final" x%.

Wouldn't the a.m. wording of the example be the right description for the performance fee calculation

without deducting the performance fee from the earnings before calculating it; and the correct wording for

the mathematical expression you showed rather be for example the Management Company will receive a

performance fee, equivalent to 9% of the positive net earnings of the fund after that performance fee is

deducted from the net earnings so that the actual performance fee is 8,26%?

Article 13, 13 (a) and Article 10

Subject Matter

Major holdings notification – definition of indirect holding

Question

The question refers to the interpretation of the meaning of indirect holdings of other financial instruments (Article 13) for the purpose of aggregated notification (Article 13a).

National Competent Authorities request that the European Commission clarify the meaning of ‘indirect holding’ in the context of financial instruments other than shares (i.e., securities providing voting rights).

The TD explicitly specifies, under Article 10, the different cases of indirect holdings of voting rights that are subject to notification.

In the case of financial instruments not granting voting rights (Article 13 and its reference in Article 13a) there is, however, no explicit definition of those cases of indirect holdings; and no explicit link to Article 10.

National Competent Authorities have raised questions about the precise definition of indirect holdings in this context—specifically, whether a full “look-through” approach must always be applied, or whether the limitation to the look-through approach set out in paragraph 10(e) also applies to financial instruments. In particular, it is unclear whether financial instruments held by a third party in its own name but on behalf of the person or entity concerned—such as those described in paragraph 10(g)—should be excluded.

Article 5

Subject Matter

Due diligence

Question

How should the due diligence requirements set out in Article 5(2) of the ESCPR be applied by CSPs?

ESMA Answer

05-01-2026

Original language

Article 5 of the ECSPR requires CSPs to undertake at least a minimum level of due diligence in respect of project owners proposing their projects to be funded through their crowdfunding platform.

Points (a) and (b) of Article 5(2) of the ECSPR provide a list of evidence that a CSP needs to obtain from project owners as part of its minimum due diligence requirements.

ESMA believes that CSPs should comply with the provisions set out in point (a) and point (b) mentioned above with regard to all project owners who propose their projects to be funded through their crowdfunding platform regardless of whether a project owner is in the form of natural or legal person.

For point (b)(*), the provisions of Directive 2015/849, and especially Recital 29, support an application of the provision to project owners both in the form of a legal person or a natural person.

In relation to point (a) of Article 5(2) of the ECSPR, the same approach shall be followed. CSPs are therefore expected to ensure that, if the project owner is a legal person, the evidence of the lack of criminal records is provided in relation to the legal person, as well as in relation to shareholders who directly or indirectly hold 20% or more of the legal person's share capital or voting rights, each member of the legal person's management body (**), including persons who effectively direct its business (***).

Footnotes

(*) According to which CSPs shall obtain evidence that the project owner is not established in a non-cooperative jurisdiction, as recognised by the relevant Union policy, or in a high-risk third country pursuant to Article 9(2) of Directive (EU) 2015/849 (AML Directive).

(**) In line with what is established under other EU legislative acts (such as MiFID II (directive 2014/65/EU), and CRD (Directive 2013/36/EU)), 'management body' should be intended as the body or bodies of an entity, which are appointed in accordance with national law, which are empowered to set the entity's strategy, objectives and overall direction, and which oversee and monitor management decision-making and include persons who effectively direct the business of the entity.

(***) This reference should be intended as concerning those persons who effectively direct the business of a project owner, irrespective of whether or not they are members of the management or administrative organ appointed in accordance with national company law.

Topic

Crypto-Asset Service Provider (CASP)

Subject Matter

CASP Group Structure under MiCA

Question

Under the MiCA framework, can a group structure be set up whereby a non-regulated holding acts as the principal commercial counterparty towards customers (including entering into customer contracts, maintaining customer relationships, and

issuing invoices), while a licensed Crypto-Asset Service Provider (CASP) within the same group (daughter company) performs and executes the regulated crypto-asset services?

In such a structure, would it be permissible for the CASP to provide the regulated services without directly contracting with, or invoicing, the end customers, provided that all MiCA requirements (including governance, outsourcing, conflict of interest, and conduct of business rules) are appropriately met?

ESGR - Regulation (EU) 2024/3005

Topic

Temporary regime for small providers

Subject Matter

Small ESG rating provider no longer meeting temporary regime size requirements

Question

If an ESG rating provider established in the Union registered under the temporary regime ceases to meet the criteria in order to be categorised as a small undertaking, can it continue operating until it is authorised pursuant to Article 8?

ESMA Answer

18-12-2025

Original language

If a small ESG rating provider ceases to meet the criteria for the temporary regime, Article 5(3) of the Regulation applies, i.e. the ESG rating provider becomes subject to all provisions of the Regulation and must apply to ESMA for authorisation under Article 6 within six months.

The ESG rating provider remains listed in the register referred to in Article 14 and may continue providing services in the EU until its application has been examined by ESMA and a decision to grant authorisation adopted. In this instance, the register is updated to reflect that the ESG rating provider has become authorised in accordance with Article 8 and is no longer registered under the temporary regime for small ESG rating providers.

If it does not apply for authorisation within the six-month period or if ESMA decides to refuse authorisation, the ESG rating provider must immediately cease all activities and will be removed from the register of ESG rating providers.

Temporary regime for small providers

Subject Matter

Content of temporary regime notification

Question

What information should a small ESG rating provider submit to ESMA for its assessment to determine whether to register a small ESG rating provider for the purposes of the temporary regime pursuant to Article 5(2)?

ESMA Answer

18-12-2025

Original language

ESMA will need to review, as a minimum, the annual audited financial statements and employment records of the notifying entity.

In the case of a newly established legal entity, projected figures may be used provisionally for ESMA's assessment. This may include founding accounts, business projections and “bona fide” estimates accompanied by managerial sign-off.

Level 1 Regulation

ESGR - Regulation (EU) 2024/3005

Topic

Temporary regime for small providers

Subject Matter

Group-affiliated small ESG rating providers

Question

Is a small ESG rating provider that is part of a medium-sized or large group eligible for the temporary regime under Article 5 of Regulation (EU) 2024/3005 when it is operating independently of the group's resources and consolidated capacity?

ESMA Answer

18-12-2025

Original language

No. Particular attention must be paid to Recital 48, according to which ESMA should ensure that risks of circumvention of the Regulation are avoided, “particularly by preventing small undertakings within medium-sized or large groups according to the criteria laid down in Directive 2013/34/EU from benefitting from the temporary regime”.

The temporary regime was introduced to facilitate the market entry of smaller ESG rating providers by allowing them to benefit from more proportionate requirements for a three-year period.

Subject Matter

NEW LIQUIDITY MANAGEMENT TOOLS REQUIREMENTS FOR UCITS AND OPEN ENDED AIFS COMING INTO EFFECT ON 16 APRIL 2026: DOES THE SCOPE OF LMTs EXTEND TO NON-EU OPEN ENDED AIFS?

Question

The AIFMD II (Directive (EU) 2024/927), which will enter into effect on 16 April 2026 imposes a requirement on EU open ended alternative investment funds (EU AIFs) and UCITS to specify/include in their rules or instruments of incorporation two (2) liquidity management tools (LMTs), which are defined in the Annex V of the AIFMD II.

The AIFMD II is silent when it comes of the requirement of LMTs for non-EU open-ended AIFs such as Cayman Islands domiciled open-ended unit trusts. Can the ESMA provide clarifications on whether the requirement to choose two (2) liquidity management tools (LMTs) for open-ended EU AIFs apply also to non-EU open ended AIFs managed by an EU AIFM, even if those non-EU AIFs are not marketed in the Union?

ESMA Answer

18-12-2025

Original language

Dear Mr Biguma,

According to Article 2 of the AIFMD, the AIFMD applies to:

(a) EU AIFMs which manage one or more AIFs irrespective of whether such AIFs are EU AIFs or non-EU AIFs;

(b) non-EU AIFMs which manage one or more EU AIFs; and

(c) non-EU AIFMs which market one or more AIFs in the Union irrespective of whether such AIFs are EU AIFs or non-EU AIFs.

Therefore, following letter a), the AIFMD applies also to EU AIFMs that manage non-EU AIFs. This means that the obligation to select at least two LMTs also applies to EU AIFMs that manage non-EU AIFs, as these AIFMs are subject to the AIFMD.

We draw your attention to the fact that Article 16(2b) refers to 'AIFs' and not to 'EU AIFs'.

Thank you,

ESMA

Application of two working day notification period

Question

For the purposes of Article 15(12), does the obligation to notify the rated item or the issuer “at least two full working days before the first issuance of the ESG rating” apply exclusively to ESG ratings issued on or after 2 July 2026?

ESMA Answer

11-12-2025

Original language

The obligation to notify at least two full working days before the first issuance of the ESG rating applies to ESG rating issued on or after 2 July 2026.

For ESG ratings issued prior to 2 July 2026:

- If an ESG rating is updated or revised after 2 July 2026, it should be notified to the rated item for a fact-check at least once.
- If an ESG rating is updated or revised following a material change to its methodology after 2 July 2026, it should be notified to the rated item for a fact-check at least once.

In cases where corporate events such as an acquisition or spin-off of a new legal entity within the same group result in the assumption of responsibility for the methodology and portfolio of ESG ratings previously issued by another group entity, if no material changes to methodologies occur, this should not be treated as a new “first issuance” of those ratings. As such, no notification obligation arises under Article 15(12).

Notifications without a designated contact

Question

How should ESG rating providers contact rated items in accordance with Article 15(12), when it is not in possession of a designated contact point for a rated item?

ESMA Answer

11-12-2025

Original language

ESG rating providers should take all reasonable steps to ensure that the rated item is successfully notified in accordance with Article 15(12). Where a designated contact point is not available, providers should use alternative contact channels that are sufficiently likely to bring the notification to the rated item's attention. For example, investor relations, press office or, for sovereign issuers, the debt management office.

Providers should resort to publicly available contact div or generic corporate mailboxes only after taking reasonable steps to identify a more appropriate point of contact. Where such information cannot be identified, clear records should be maintained of the efforts undertaken to obtain it.

Additional Information

Level 1 Regulation

Regulation 648/2012 - OTC derivatives, central counterparties and trade repositories (EMIR) - CCPs

Topic

EU-CCPs

Subject Matter

CCP / clearing-like activities

Question

In EMIR, a CCP is defined as a legal person that interposes itself between the counterparties to the contracts traded on one or more financial markets, becoming

the buyer to every seller and the seller to every buyer. EMIR defines clearing as the process of establishing positions, including the calculation of net obligations, and ensuring that financial instruments, cash, or both, are available to secure the exposures arising from those positions. The definition of a CCP, however, seems to be fulfilled also by entities that are not authorised as CCPs, e.g. by firms acting as prime brokers. Prime brokers typically interpose themselves between the counterparties on a matched principal trading (MPT) basis. When they do this for markets for which it is customary to margin positions, they determine a net position on the basis of which they ask margin from their counterparties. With these activities it could be argued that prime brokers fulfil the definition of a CCP under EMIR. Another example of this are investment firms that operate an OTF offering MPT for derivatives (explicitly allowed under Article 20(2) of MiFID II).

Questions:

1. Is an authorisation as a CCP pursuant to Article 14 of EMIR mandatory for any legal person established in the Union meeting the definition of a “CCP” and providing “clearing services” in respect of financial instruments, or is it limited to entities offering clearing in OTC derivatives subject to the EMIR clearing obligation and/or in exchange-traded financial instruments? In this regard, is the intent of the legal entity (to offer clearing services as a CCP) relevant?
2. Are there other constitutive elements (e.g. intent, type of clients (retail/wholesale), loss mutualisation, unilateral margin) of the definition of “CCP”, apart from the “interposition”, i.e. becoming the buyer to every seller and the seller to every buyer, element (Article 2, point (1) of EMIR)?
3. What constitutes a “clearing service” in this context; should it be understood as “clearing” just as defined in Article 2, point (3) of EMIR or are there additional constitutive elements to be taken into account?
4. As regards the “interposition” element, where an investment firm (e.g. an OTF operator) executes transactions via matched principal trading (e.g. in accordance with Article 4(1), point (38), of MiFID II), do such matched principal trading transactions qualify as “interposition” (by the investment firm) for the purpose of the definition of a “CCP” pursuant to Article 2, point (1), of EMIR? If so, how would an investment firm (e.g. an OTF operator) using matched principal trading for the execution of transactions differ from a CCP?
5. Do CCP clearing services need to be performed by a separate legal entity from

other regulated functions (e.g. the investment firm function), or can one legal entity perform CCP clearing services together with other activities (not linked to clearing) such as investment firm services?

Additional Legal Reference

Article 13a Transparency Directive

Subject Matter

Major holdings notification - aggregation

Question

It is not clear whether a parent undertaking is required to aggregate an Entitlement to Acquire and/or Financial Instrument with Similar Economic Effect (collectively the “Article 13 Financial Instruments”) which its subsidiary undertaking holds indirectly. For instance, where a subsidiary owns share options having voting rights (i.e. an Article 13 Financial Instrument - article 13(1)(a)) in an issuer, but holds those share options through a trustee (therefore falling under article 10(g)), would the subsidiary’s ‘indirect’ control over the voting rights pursuant to the share options (registered in the name of the trustee) need to be aggregated by the parent?

The doubt arises because article 10 of the Transparency Directive which creates a list of cases where an indirect holding is said to arise cross-refers only to article 9 (i.e. to holdings of voting rights), and not to Article 13 Financial Instruments. Accordingly, there is doubt, whether the reference to “indirect” holdings of Article 13 Financial Instruments in article 13a(1) (regarding aggregation) should be interpreted with the plain English meaning of “indirect” which refers to a parent-sub relationship, or whether it should be extended to include all the forms of indirect ownership under article 10 of the Transparency Directive.

Topic

White paper

Additional Legal Reference

143(2)

Subject Matter

Offerors and CASPs' responsibilities with regards to white papers for Title II tokens admitted to trading prior to 30 December 2024

Question

What are the respective responsibilities of offerors, persons seeking admission to trading, operators of trading platforms and other CASPs mentioned in Article 66(3) of MiCA with regard to white papers for crypto-assets other than ARTs and EMTs that were admitted to trading prior to 30 December 2024?

ESMA Answer

14-10-2025

Original language

Article 143(2) of MiCA provides that *“by way of derogation from Title II, only the following requirements shall apply in relation to crypto-assets other than asset-referenced tokens and e-money tokens that were admitted to trading before 30 December 2024:*

a. Articles 7 and 9 shall apply to marketing communications published after 30 December 2024;

b. Operators of trading platforms shall ensure by 31 December 2027 that a crypto-asset white paper, in the cases required by this Regulation, is drawn up, notified and published in accordance with Articles 6, 8 and 9 and updated in accordance with Article 12”

For Title II crypto-assets admitted to trading prior to 30 December 2024, offerors and persons seeking admission to trading must therefore only comply with marketing rules. There is no white paper requirement.

Operators of trading platforms must, by 31 December 2027, ensure there is a white paper. In line with Article 66(3) of MiCA, they must also publish hyperlinks to any existing (registered) white papers.

Finally, the other CASPs referenced in Article 66(3) must only publish hyperlinks to any existing (registered) white papers. Where there are no such white papers, they do not have the responsibility to ensure they are produced.

If the crypto-asset is not available on a trading platform, there might not be a white paper for it even after 31 December 2027.

Regulation (EU) 2022/2554 - The Digital Operational Resilience Act (DORA)

Topic

ICT third-party risk management

Additional Legal Reference

28(6), 30(3)(e)

Subject Matter

Audit frequency limitations

Question

As DORA requires financial entities to pre-determine the frequency of audits and inspections on the basis of a risk-based approach, are financial entities not permitted to agree on a maximum audit frequency (e.g. once per year) with their ICT third-party service providers?

ESMA Answer

18-09-2025

Original language

DORA does not limit the financial entities in the way to implement the relevant audit requirements, including regarding the audit frequency. In case the contracts between the financial entities and their ICT third-party service providers would refer to a (maximum) audit frequency, the frequency shall be agreed by the financial entities (i.e., not imposed by the ICT third-party service providers) and shall not prevent the financial entities to implement the DORA audit requirements on a risk-based approach.

Therefore, financial entities shall also ensure that the contractual arrangements grant them the ability to carry out an audit on an ad-hoc basis when they find it necessary to comply with the DORA requirements (for example, in the event of doubts regarding the proper performance of the contract), without the clause on the audit frequency preventing it. If such conditions are met, the financial entities and their ICT third-party service providers may agree on an audit frequency in their contracts.

Intent to Present Future Performance in Percentage Terms in Robo-Advisory App – Compliance with MiFID II (incl. Article 44) and PRIIPs

Question

We are currently exploring the possibility of presenting future performance in percentage terms within our robo-advisory application. The app provides automated investment recommendations based on client profiling and risk tolerance, and may in the future include visual projections of potential returns.

These projections would be expressed as percentages, clearly labeled as hypothetical, and accompanied by appropriate disclaimers and risk warnings. The format would follow the structure and methodology of performance scenarios as outlined in Annex IV of the PRIIPs Regulation.

In this context, we would like to clarify:

Is it permissible to present future performance in percentage terms if the format aligns with the performance scenarios described in PRIIPs Annex IV?

Would such a presentation be compliant with Article 44 of MiFID II, particularly in digital interfaces?

Subject Matter

EMIR 3.0 Active Account Requirement and Reporting Obligation

Question

Should counterparties that clear 100% of their relevant derivatives contracts in the EU still be required to comply with the representativeness obligation under Article

7a(3)(d) of EMIR, the reporting obligation under Article 7b(1), and the representativeness reporting requirements outlined in the RTS?

ESMA Answer

13-10-2025

Original language

As clarified by ESMA_QA_2517, counterparties that clear 85% of the relevant derivatives contracts in a CCP authorised under Article 14 of EMIR are exempted from the operational, stress testing and reporting requirements referred under Article 7a and 7b of EMIR. They are not exempted from the representativeness obligation under Article 7a(3), point (d), of EMIR

However, the representativeness requirement requires counterparties to clear trades representative of the trades "that are cleared at a clearing service of substantial systemic importance". Therefore, where is no activity at a clearing service of substantial systemic importance, the representativeness requirement should not apply.

Status: Answer Published

Additional Information

Level 1 Regulation

Regulation 648/2012 - OTC derivatives, central counterparties and trade repositories (EMIR) - CCPs

Topic

EU-CCPs

Subject Matter

Reporting of the representativeness obligation

Question

Does the 85% exemption from reporting for entities under Article 7b also apply to the reporting of the representativeness obligation, or does it only apply to the

reporting of activities, risk exposures, and operational conditions?

ESMA Answer

13-10-2025

Original language

A counterparty can benefit from the exemption mentioned in Article 7a(5) of EMIR at any point in time by demonstrating that it clears at least 85 % of its derivative contracts belonging to the categories referred to in Article 7a(6) of EMIR at a CCP authorised under Article 14 of EMIR.

As confirmed by Q&A 2517, entities that clear 85% or more of the relevant derivatives contracts in a CCP authorised under Article 14 of EMIR are exempted from:

- the operational requirements referred to in Article 7a(3), points (a), (b) and (c), of EMIR;
- the stress-testing requirement referred to in Article 7a(4), fourth subparagraph, of EMIR;
- the reporting requirements referred to in Article 7b of EMIR.

Article 7b(1) of EMIR 3 states: “A *financial counterparty or a non-financial counterparty that is subject to the obligation referred to in Article 7a shall (...) report every six months to its competent authority the information necessary to assess compliance with that obligation.*”

Article 7b(1) refers broadly to “the obligation referred to in Article 7a”, which includes: operational conditions (legal, IT, and internal processes) and the representativeness obligation (Article 7a(3)(d)). Therefore, entities benefitting from the exemption mentioned in Article 7a(5) are exempted from reporting requirements necessary to demonstrate compliance with the representativeness obligation.

Subject Matter

Scope of the exception in Article 19(12a) of MAR to PDMRs' general prohibition to trade during the closed period

Question

Shall a PDMR be allowed to adhere to a takeover bid, a share capital increase, a subscription of shares arising from stock splits, a merger, a rights issue or a spin-off during a closed period pursuant to Article 19(12a) of MAR?

ESMA Answer

01-08-2025

Original language

Recital (76) of Regulation (EU) 2024/2809 amending MAR, provides examples of transactions and activities that might be covered by the exemption for PDMRs to trade during the closed period under Article 19(12a) of MAR. Among the examples provided, the text refers to the transactions and activities that might result from “duly authorised corporate actions not implying advantageous treatment for the [PDMR]”. Considering that a takeover bid, as well as the other mentioned transactions, should in principle grant PDMRs an equivalent treatment to that of any other shareholder, a PDMR should be allowed to adhere to these transactions during a closed period provided that the corporate action has been authorized or approved by the issuer’s governing body or the competent authority.

A case-by-case assessment remains necessary to verify that the relevant conditions are met. It should be recalled that the prohibition of insider dealing remains applicable during closed periods.

Topic

Costs and fees

Subject Matter

Performance fees for feeder funds

Question

Can the manager of a feeder fund within the meaning of Article 58 of the UCITS Directive charge a performance fee?

ESMA Answer

15-07-2025

Original language

Under Article 58 of the UCITS Directive, a feeder fund is a fund which has been approved to invest at least 85 % of its assets in units of another fund (master funds). Paragraph 18 of the Guidelines states that a manager “should always be able to demonstrate how the performance fee model of a fund it manages constitutes a reasonable incentive for the manager and is aligned with investors’ interests”.

Against this background, the feeder manager does not exercise sufficient discretion over the asset allocation, selection and fund strategy to warrant the charging of a performance fee and as such, the charging of a performance fee to investors should not be considered as appropriate and justified in such cases. Therefore, performance fees, if any, should only be charged at the level of the master fund.

This is unless:

a) the master fund and the feeder fund are managed by the same manager or by managers belonging to the same group; and

b) the only investor(s) of the master fund is(are) feeder fund(s);

in which case performance fees could be paid at the level of the feeder fund(s), and not at the level of the master fund, provided that this approach applies consistently to all feeder funds, if more than one.

Subject Matter

Use of fiduciary (nominee) structures in equity crowdfunding

Question

Can CSPs use nominee structures as part of their operations in relation to transferable securities or admitted instruments for crowdfunding purposes? (Edited)

ESMA Answer

04-07-2025

Original language

The terms “nominee structure”, “nominee service”, or “nominee” are used by market participants in the field of crowdfunding to refer to a wide range of practices often aiming at aggregating investors. ESMA notes that the concept of “nominee” is not defined in the ECSPR.

ESMA further notes that the ECSPR does not explicitly prohibit ‘nominee entities’ from offering ‘nominee services’ related to the operation of a crowdfunding platform, the ‘nominee’ entity being involved at the initiative of the crowdfunding service provider or of the project owner.

ESMA is nevertheless of the view that the provision of such ‘nominee’ services’, being part of the “*operation of the crowdfunding platform*” within the meaning of Article 1(1) of the ECSPR should (i) be described in the application submitted to the authorising competent authority under Article 12 of the ECSPR and (ii) comply with the provisions of the ECSPR.

ESMA underlines that CSPs shall inform the authorising competent authority – at the time of the authorisation or, if the authorisation has already been granted, prior to implementation of their intention use a nominee structure. Information should include a detailed description about the ‘nominee’ structure that they intend to use, as well as the div of the nominee agreement between the nominee structure and investors with specific consideration of the arrangements concerning ownership, voting and exit rights, costs and implications in terms of applicable national laws, as

requested by the authorising competent authority. The information provided shall enable the competent authority to perform a comprehensive assessment of the legal features of the nominee entity, the nominee agreement, and to determine whether the suggested 'nominee structure' is compliant with the ECSPR, notably, but not limited to, with the provisions listed below.

- Point (a)(ii) of Article 2(1):

Point (a)(ii) of Article 2(1) of the ECSPR and Recital 22 make clear that, pursuant to the ECSPR, the investment by an investor in a crowdfunding project shall be direct, in the sense that only transferable securities and admitted instruments for crowdfunding purposes issued by project owners or a special purpose vehicle can be purchased by crowdfunding investors on a crowdfunding platform authorised in accordance with the ECSPR. This means that the decision as to which crowdfunding project should be financed should always be left to investors. ESMA therefore considers that nominee structures may provide their services in the context of crowdfunding services only once the relevant investor has taken an investment decision in respect of the specific project in which it intends to invest.

CSPs wishing to use a nominee structure should also carefully assess any structure in which investors' funds are not used by the nominee structure to purchase the transferable securities or the admitted instruments for crowdfunding purposes issued by a project owner or an SPV as indicated by the relevant investor in their investment decision, as such arrangements are unlikely to comply with Point (a)(ii) of Article 2(1) of the ECSPR.

Likewise, CSPs wishing to approve a new crowdfunding project on its platform are expected to ensure that no such arrangements have been set up by said project owner.

- Article 10(3) of the ECSPR

When nominee services are performed in relation to transferable securities or admitted instruments for crowdfunding purposes offered on a crowdfunding platform in accordance with the ECSPR, and these services include the provision of custody services, the CSPs shall ensure that the 'nominee structure' complies with Article 10(3) of the ECSPR:

"Transferable securities or admitted instruments for crowdfunding purposes offered on a crowdfunding platform, and which can be registered in a financial instruments account opened in the name of an investor or which can be physically delivered to a custodian, shall be held in custody by the crowdfunding service provider or by a third party. An entity providing custody services shall hold an authorisation in accordance with Directive 2013/36/EU or 2014/65/EU".

CSPs are expected to provide the authorising competent authority with relevant information, as requested by the authorising competent authority, about the 'nominee structure' they wish to set up, be it at the time of the initial authorisation or after such authorisation is delivered. The information provided shall enable the competent authority to perform a case-by-case basis assessment aiming at determining whether the suggested 'nominee structure' involves the holding in custody, by the 'nominee entity', of transferable securities or admitted instruments for crowdfunding purposes. Indeed, while it is acknowledged that 'nominee' service and custody are usually considered as two distinct concepts, they may, in practice, overlap.

If the national competent authority concludes that the suggested nominee arrangement is structured in a way that the transferable securities or admitted instruments for crowdfunding purposes offered on the crowdfunding platform are

held in custody by the entity acting as 'nominee', then this entity will be required to be authorised in accordance with Directive 2013/36/EU or 2014/65/EU as per Article 10(3) of the ECSPR.

This assessment will be performed by competent authorities based on applicable European and national law. The following elements may, *inter alia*, be considered for the purpose of this assessment.

1. Holding of assets/Safekeeping: CSPs will be required to provide relevant information enabling competent authorities to assess whether or not the 'nominee' entity holds the client's assets and whether or not the 'nominee' entity appears as the legal owner of the assets (with the investor being the beneficial owner).
2. Administration/Ownership record keeping: CSPs will be required to provide relevant information enabling competent authorities to assess whether or not the 'nominee' entity keeps accurate records of ownership and/or perform administrative tasks in relation to the ownership of the transferable securities or admitted instruments for crowdfunding purposes.
3. Asset-Segregation: CSPs will be required to provide relevant information enabling competent authorities to assess whether or not the 'nominee' keeps track of the respective ownership of investors into the various crowdfunding projects offered on the crowdfunding platform through segregated accounts.

ESMA Q&A_801 may also be taken into account for the purpose of understanding the mentioned requirements with regard to the custody services¹.

- Article 19(1) of the ECSPR

When investing in a crowdfunding project implies for investors the entry into a specific 'nominee' agreement, ESMA is of the view that investors should be duly informed of this feature. ESMA also believes that the information concerning the use of nominee structures in the provision of crowdfunding services are included in the information that CSPs provide to clients and shall thus be fair, clear and not misleading, as indicated in Article 19(1) of the ECSPR.

Article 19(1) of the ECSPR states that *"All information ... from crowdfunding service providers to clients about themselves, about the costs, financial risks and charges related to crowdfunding services or investments, about the crowdfunding project selection criteria, and about the nature of, and risks associated with, their crowdfunding services shall be fair, clear and not misleading".*

- Article 23 of the ECSPR

When investing in a crowdfunding project implies for investors to enter into a specific 'nominee' agreement, ESMA is also of the view that this information should be clearly disclosed to investors in the KIIS.

ESMA believes that the information provided to investors should include, where applicable, (i) the key features of the nominee agreement (including its purpose, the div on the ownership of the instruments, the exercise of investor rights etc. and how they comply with national law requirements), (ii) the costs of entering into such agreement as well as the main risks (e.g., with regard to the possible consequences of the nominee's bankruptcy) and (iii) information about the entity performing the

service.

In particular, and in line with Article 23 of the ECSPR and Delegated Regulation 2022/2119²:

- When the nominee structure is deemed by the competent authority to provide custody services as referred to in Article 10(3) of the ECSPR, the relevant information on the div of the authorised entity performing the custody services shall be provided in the section “*Custody and delivery of [transferable securities] or [admitted instruments for crowdfunding purposes] to investors*” of the KIIS as referred to in Annex 1 (point (e) of Part D) of the ECSPR and as further explained in point (e) of Part D of the Annex to Delegated Regulation 2022/2119.
- Part D of the KIIS on *Information related to the offer of transferable securities and admitted instruments for crowdfunding purposes* as well as Part F of the KIIS on *Investor rights* should be duly reviewed and adapted to the case in which the legal ownership of financial instruments and admitted instruments for crowdfunding purposes is assigned to a nominee structure (and investors remain beneficial owners). ESMA believes that at least the following information should be provided in the KIIS:
- Clear indication that the decision to subscribe transferable securities and admitted instruments for crowdfunding purposes encompasses the entry into a ‘nominee’ agreement.

1. Concise explanation of the purpose of the 'nominee' agreement and of its functioning during the subscription, holding and sale and re-sale (exit) phases.

- Explanation of how the rights (ownership and voting) attached to the transferable securities and admitted instruments for crowdfunding purposes offered by the project owner or the SPV will be exercised and protected where legal ownership of the securities rests with the nominee entity, including a clear outline of the procedures by which investors may assert their rights, participate in decision-making, receive distributions, and address potential disputes. This disclosure should clarify any limitations or special processes that apply in such structures, ensuring investors understand how their beneficial interests are represented and safeguarded when a nominee acts on their behalf as the legal holder of the securities.

2. If the entry into a nominee agreement is not mandatory (i.e. if investors are able to subscribe for shares of the crowdfunding project without entering into a nominee agreement) or not.

- Part H of the KIIS on *Fees, information and legal redress of the KIIS* should provide information on the costs for investors associated with the provision of the nominee services.

Submission Date

20/06/2025

Status: Answer Published

Additional Information

Level 1 Regulation

MiCA

Topic

Crypto assets

Subject Matter

Shared order book model

Question

Under the Markets in Crypto-Assets Regulation (MiCA), is it permissible for an EU trading platform for crypto-assets that is operated by a crypto-asset service provider (CASP) authorised under MiCA to pool its order book with that of one or more non-

EU trading platforms operated by an entity or entities that are not authorised as CASPs under MiCA?

ESMA Answer

20-06-2025

Original language

No, this model would be in breach of the authorization requirements under Article 59 of MiCA and would constitute the unauthorized provision of the crypto-asset service of operation of a trading platform for crypto-assets in the Union by the unauthorized entities whose platform(s) share the order book with the EU-authorized CASP.

Reference is made to the model where two or more crypto-asset platforms merge their individual order books into a single, unified order book from which orders are matched. This model involves - as operators of said shared order book - one or more entities that are not authorised as CASPs under MiCA.

ESMA understand that this integrated model enables buy and sell orders from different platforms to be combined into one aggregated order book so that multiple trading platforms (including non-EU ones) can access the same liquidity pool, allowing orders from clients across different platforms to be matched.

According to Article 3(18) of MiCA, the service of operation of a trading platform for crypto-assets means *'the management of one or more multilateral systems, which*

bring together or facilitate the bringing together of multiple third-party purchasing and selling interests in crypto-assets, in the system and in accordance with its rules, in a way that results in a contract, either by exchanging crypto-assets for funds or by the exchange of crypto-assets for other crypto-assets'. In the view of ESMA, the management of an order book is one of the fundamental parts of the management of multilateral systems bringing together or facilitating the bringing together of multiple third-party purchasing or selling interests in crypto-assets.

On this basis, ESMA is of the view that it should be regarded as falling within the scope of the crypto-asset service defined in Article 3(1)(18) of MiCA. Hence, the service should be regarded as being carried out by each entity operating the different order books that are being shared.

It ensues that, in accordance with Article 59 of MiCA, any person managing said order book should be authorised to do so under Article 63 of MiCA (or should have notified its intention to operate a trading platform for crypto-assets in accordance with Article 60 of MiCA).

Thus, in ESMA's view, Articles 59, 60 and 63 of MiCA prohibit an order book managed with entities that are not authorised as crypto-asset service providers (CASPs) under MiCA.

This Q&A does not assess whether other types of shared order books would fully comply with all provisions of MiCA.

Publication of prospectus

Historic Question Reference

ESMA, Questions and Answers on the Prospectus Regulation, version 12 (the “ESMA Prospectus Q&A”), Qs 4.2 and 15.7.

Additional Legal Reference

The (Swedish) Act (2019:414) with supplementary provisions to the EU Prospectus Regulation (the “Swedish Supplementary Act”), Ch. 2, Sec. 1.; Regulation (EU) 2024/2809 (the “Listing Act”)

Subject Matter

The calculation of offers of warrants and/or units consisting of warrants and shares in relation to exemptions from the prospectus obligation in the Prospectus Regulation.

Question

1. Member State incorporated exemptions in accordance with Article 3(2) item (b) of the Prospectus Regulation. Should a rule, incorporated by a Member State in accordance with Article 3(2) item (b) of the Prospectus Regulation, granting an exemption from the prospectus obligation be interpreted so that the “total consideration” of an offer of warrants only includes the consideration paid in conjunction with the initial offer, and not the strike price of the underlying securities?;

2. Offers of warrants as a part of units. How should the phrase “total consideration” be interpreted in relation to offers of units consisting of shares (offered against consideration) and warrants (offered free of charge)? Should the “total consideration” only include the consideration for the shares and thus exclude the strike price of the underlying securities?; and

3. The warrants' exercise period. Does the date of the occurrence of the warrants' exercise period, in relation to the date of the initial offer, affect this interpretation and how the calculation of the “total consideration” is to be conducted? Specifically, does it have an impact on how the calculation is to be conducted if the exercise period occurs within the 12-month period? Is there any difference in how you should perform the calculation if the exercise period occurs within either 3, 6, 9 or 12 months from the date of the initial offer? Does it make any difference whether the warrants are offered in the form of a unit?

clients or opt-in professional clients

Question

Which type of rebates or discounts on transaction fees or any other benefits for investment firms acting on behalf of retail clients or opt-in professional clients are out of the scope of the prohibition to receive payment for order flow specified in Article 39a MiFIR?

ESMA Answer

03-03-2026

Original language

Answer provided by the European Commission

According to Article 39a (1), second subparagraph of MiFIR, rebates or discounts on the transaction fees of execution venues, which are permitted under the approved and public tariff structure of a trading venue in the Union or of a third-country trading venue, which exclusively benefit the client, and which do not result in a monetary benefit to the investment firm, are out-of-the scope of the prohibition to receive PFOF. Those tariff structures should however comply with Article 5 of Commission Delegated Regulation (EU) 2017/573, which sets out requirements to ensure fair and non-discriminatory fee structures².

(2) Trading venues shall not offer their members, participants or clients a fee structure whereby, once their trades exceed a given threshold, all of their trades benefit from a lower fee for a set period, including those trades that were executed prior to reaching that threshold.” Article 5 of Commission Delegated Regulation (EU) 2017/573 of 6 June 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council on markets in financial instruments with regard to regulatory technical standards on requirements to ensure fair and non-discriminatory co-location services and fee structure“.

Subject Matter

Payment for order flow (PFOF) prohibition and OTC execution of client orders

Question

Does the prohibition of receiving payment for order flow (PFOF) apply to situations where the order is not executed on a trading venue, for instance for products traded over the counter (OTC)?

ESMA Answer

03-03-2026

Original language

Answer provided by the European Commission

The scope of application of Article 39a of MiFIR should be considered taking into account the core policy objectives of MiFIR, including:

- (a) investor protection;
- (b) execution of orders in the best interest of clients.

Since those objectives support the broadest possible coverage of execution venues, the prohibition should be understood as applying not only to transactions executed on a trading venue, but also to transactions executed over the counter (OTC).

That interpretation would also be consistent with the definition of an “execution venue” set out in Article 64(1), second subparagraph, of Commission Delegated Regulation (EU) 2017/565.¹

(1) Execution venue’ includes a regulated market, an MTF, an OTF, a systematic internaliser, or a market maker or other liquidity provider or an entity that performs a

similar function in a third country to the functions performed by any of the foregoing.” (Article 64(1) Commission Delegated Regulation (EU) 2017/565).

Article 39a

Subject Matter

Payment for order flow (PFOF) prohibition and client instructions for order executions

Question

Does the prohibition of receiving payment for order flow (PFOF) apply to situations where the client provided a specific instruction to the investment firm to execute the order on a particular execution venue?

ESMA Answer

03-03-2026

Original language

Answer provided by the European Commission

Yes, Article 39a of MiFIR does not make any distinction between orders executed with or without specific instructions from clients. Therefore, the prohibition of PFOF also applies where the client instructed the investment firm to execute the order on a specific execution venue.

Investment firms' use of rebates and discounts to lower fees for clients under the payment for order flow (PFOF) prohibition

Question

Under Article 39a of Regulation (EU) 2014/600/EU (MIFIR), are investment firms allowed to use rebates and discounts on the transaction fees of execution venues to lower fees for clients?

ESMA Answer

03-03-2026

Original language

Answer provided by the European Commission

Yes, investment firms are allowed to use rebates and discounts to lower fees for clients but only where they comply and are able to demonstrate their compliance with all of the following conditions set out in Article 39a(1) of MiFIR:

- (a) the rebate or discount on the transaction fees of execution venues is permitted under the approved and public tariff structure of the relevant trading venue in the Union or of the relevant third-country trading venue;
- (b) the rebate or the discount exclusively benefits the client and not the firm;
- (c) they do not result in a monetary benefit to the investment firm

Article 5(2) of MiCA

Subject Matter

Application of Title II requirements to CASPs operating a trading platform for crypto-assets

Question

Article 5(2) of MiCA states that “when a crypto-asset is admitted to trading on the initiative of a trading platform and a crypto-asset white paper has not been published in accordance with Article 9 in the cases required by this Regulation [emphasis added], the operator of that trading platform for crypto-assets shall comply with the requirements set out in paragraph 1 of this Article”.

In turn, Article 9 requires offerors and persons seeking admission to trading of crypto-assets other than ARTs or EMTs to publish their crypto-asset white papers and any marketing materials.

However, recital 22 of MiCA states that “Where crypto-assets have no identifiable issuer, they should not fall within the scope of Title II, III or IV of this Regulation”.

Does the expression “in the cases required by this Regulation” mean that Article 5(2) exempts operators of trading platforms from the requirements of Article 5 for crypto-assets without an identifiable issuer?

ESMA Answer

18-02-2026

Original language

Answer provided by the European Commission

Yes. Article 5(2) MiCA is not conceptualized to cover cases where crypto-assets have no identifiable issuer and are therefore not subject to Title II of MiCA. The Article requires CASPs operating a trading platform to comply with the requirements set out in Article 5(1) MiCA, where they initiate the admission of crypto-assets to trading and no white paper has been published ‘in the cases required by this

Regulation'. Hence, this provision is specifically and exclusively limited to cases, where a white paper is required by MiCA. However, as clarified by recital 22, crypto-assets without an identifiable issuer do not fall within the scope of Title II. It follows that no white paper is required for these crypto-assets under MiCA and that, consequently, Article 5(2) MiCA does not apply to them. Nevertheless, in accordance with the wording in recital 22 that CASPs 'providing services in respect of such crypto-assets should be covered by this Regulation', CASPs operating a trading platform are not relieved from obtaining authorisation and complying with their general obligations, including a suitability assessment of any admitted crypto-assets and determination of whether an identifiable issuer exists, i.e. whether a white paper is required. Similarly, and in line with the above, Articles 76(1)(2) and 143(2)(b) MiCA impose requirements on CASPs operating a trading platform and specifically reference to 'cases required by this Regulation'. Finally, Article 66(3) shall be interpreted as meaning that operators of trading platforms must provide clients with hyperlinks to any white papers for the crypto-assets in relation to which they are providing services, provided that a white paper is required under MiCA.

Crypto-Asset Service Provider (CASP)

Additional Legal Reference

Article 3(1)(22) of MiCA

Subject Matter

Overlap between offers of crypto-assets and placing

Question

Can persons who are authorized in writing by the issuer to offer crypto-assets to the public conduct this activity on a commercial basis, continuously, repeatedly, and possibly for different issuers (whether concurrently or consecutively) without having a MiCA CASP license for the crypto-asset service 'placing of crypto-assets'?

ESMA Answer

18-02-2026

Original language

Answer provided by the European Commission

Yes, where a person offers to the public crypto assets upon the written consent of the issuer, for instance, under the conditions set out in Article 16(1) MiCA, second sub paragraph, that person acts on behalf of the issuer and no CASP license is to be required, where that activity is not exercised in the context of the provision of the crypto-services. However, where the person offering crypto-assets to the public engages in the placing of crypto assets or in any other crypto-asset service covered by MiCA carried out on a professional basis, it is to be considered as a crypto-service provider as defined under Article 3(22) MiCA, and that person must obtain a CASP license for the relevant services. In cases where a person is offering crypto-assets to the public on behalf of the issuer, that person must comply with provisions relating to the offer and marketing of the crypto-assets as specified under MiCA (for instance, for ARTs, the person is to comply with Articles 27, 29 and 40, - without prejudice to the provisions relating to CASPs if that person provides crypto-asset services on a professional basis).

Payouts in fiat currency by CASPs in the context of exchange services

Question

Should the business model whereby a crypto-asset service provider (CASP) provides exchange services but only ever allows clients to collect their balance in fiat currency be allowed?

ESMA Answer

18-02-2026

Original language

Answer provided by the European Commission

No, business model whereby a crypto-asset service provider (CASP) provides exchange services where clients are only allowed to collect their balance in fiat currency, without having the possibility to have their crypto-asset transferred is not permitted under MiCA.

Under MiCA, "exchange services" refer to the professional activity of exchanging crypto-assets for fiat currency (which falls within the definition of 'funds') or for other crypto-assets. This service is one of several defined crypto-asset services that require a CASP, to obtain authorization.

It is possible for CASPs to propose to their clients that their balance is collected in fiat currencies instead of in crypto assets.

However, where a client purchases a crypto asset, it gives rise to an obligation on the CASP to transfer the purchased crypto-asset to the client. In that respect, the white paper to be drawn under MiCA must indicate «information on the method and time schedule of transferring the purchased asset-referenced token to the holders».

A service whereby an entity offers clients to “buy” a crypto-asset that is never delivered, and the client can only and exclusively receive the fiat currency value of such crypto-asset, is not to be allowed as a crypto-asset exchange service.

Level 1 Regulation

Regulation (EU) 2022/2554 - The Digital Operational Resilience Act (DORA)

Topic

Other DORA topics

Subject Matter

Does DORA also apply to non-EU AIFM?

Question

The regulation applies to managers of alternative investment funds according to Article 2, point (k) of DORA. According to Article 3, (point 44), of DORA a manager of alternative investment funds is defined as “a manager of alternative investment

funds as defined in Article 4(1), point (b), of Directive 2011/61/EU". According to Article 4(1), point (b), of Directive 2011/61/EU (AIFM Directive) "AIFMs" means legal persons whose regular business is managing one or more AIFs". We are of the understanding that Article 4(1), point (b), does not exclude non-EU AIFM. EU AIFM and non-EU AIFM are defined in Article 4(1), point (L) and point (ab). Since DORA only refers to article 4(1), point (b), of the AIFM Directive and not to article 4(1), point (L), we are wondering if DORA applies to both EU and non-EU AIFM as the definition implies.

ESMA Answer

27-05-2025

Original language

DORA applies to managers of alternative investment funds according to Article 2, point (k) of DORA, except for those managers of alternative investment funds referred to in Article 3(2) of Directive 2011/61/EU. According to Article 3, (point 44), of DORA, a manager of alternative investment funds is defined as "a manager of alternative investment funds as defined in Article 4(1), point (b), of Directive 2011/61/EU".

However, the definition of the managers included in Article 4(1), point (b), of Directive 2011/61/EU should be read in conjunction with the scope of application of Directive 2011/61/EU, contained in Article 2 of that Directive.

Hence, in general terms - and provided that this answer is not carrying out a detailed recollection of all the criteria referred to in Article 2 of Directive 2011/61/EU - Article 4(1), point (b), in conjunction with Article 2 of Directive 2011/61/EU implies that DORA applies to EU AIFMs and also to non-EU AIFMs, which manage one or

more EU AIFs, and to non-EU AIFMs which market one or more AIFs in the Union irrespective of whether such AIFs are EU AIFs or non-EU AIFs, to the extent that they benefit from the management and marketing passport in accordance with Articles 39, 40 and 41 AIFMD. Non-EU AIFMs will only be subject to DORA obligations once the European Commission adopts Delegated Acts extending the marketing and management passport to them.

MiCA

Topic

White paper

Subject Matter

Exemption from white paper requirements when offering a crypto-asset other than an ART or EMT

Question

Is the preparation of a white paper under MiCA mandatory for crypto-asset offerings that fall under the exceptions in Article 4(2) and 4(3) of MiCA, where the offeror only

intends to have the token traded on DEX platforms or CEXs in other jurisdictions (i.e. outside the European Union)?

ESMA Answer

21-05-2026

Original language

Answer provided by the European Commission

The aim of the MiCA Regulation is to provide a comprehensive regulatory framework for crypto-assets in the Union. This intention is expressed in a number of recitals in MiCA: Recital 23 clarifies that “... all admissions of crypto-assets to trading on a trading platform for crypto-assets (admission to trading) in the Union, are properly monitored and supervised by competent authorities ...” Recital 24 clarifies that “... when seeking admission to trading of [crypto-assets other than asset-referenced tokens or e-money tokens] in the Union, offerors or persons seeking admission to trading should draw up, notify to their competent authority and publish an information document containing mandatory disclosures (‘a crypto-asset white paper’) ...” Article 4(1) introduces an obligation to draw a white paper where crypto-assets covered by Title II are offered in the Union. Accordingly, a crypto-asset that is solely admitted to trading on a platform provided by a crypto-asset service 2 provider established outside the Union and that is not otherwise offered to the public in the Union, is not subject to such an obligation. As regards crypto-assets covered by Title II that are offered to the public in the Union, Article 4(2) and Article 4(3) introduce exemptions from the obligation to draw up a white paper in certain cases. However, Article 4(4) MiCA specifies that those exemptions do not

apply when the offeror or a person acting on its behalf makes known its intention to seek admission to trading of Title II crypto-assets. In light of the limited territorial scope of MiCA, admission to trading referred to in Article 4(4) MiCA is to be understood as an admission to trading on a trading platform operated by a crypto-asset service provider established in the Union. Therefore, in the case where the crypto-asset is offered in the Union but is only admitted to trading on a platform provided by a service provider established outside the Union, Article 4(4) does not apply. The offeror can benefit from the exemptions provided in Articles 4(2) and 4(3) provided that the conditions laid down therein are respected. Consequently, in those cases offerors are not under an obligation to draw a white paper for that crypto-asset. Additional, listing of crypto-assets on decentralised exchanges in the Union, could amount to an offer to the public. However, pursuant to Recital 22 MiCA, crypto-asset services provided in a fully decentralised manner without any intermediary are not in scope of the MiCA Regulation. Whether a platform is fully decentralised or not, is assessed on a case-by-case basis by the competent authorities.
