Yes. An MTF operated in the EU is a regulated market within the scope of the UCITS framework as long as it meets the requirements set out in Article 50(1)(b). Instruments in which a UCITS invests that are traded on such an MTF on behalf of a UCITS must comply with the Eligible Assets Directive<sup>[1]</sup>, in particular with its Article 2(1). If a UCITS proposes to invest in such an instrument, it should actively seek and review information regarding the liquidity and negotiability of that instrument in order to be satisfied that the presumptions of liquidity and negotiability in the last sub-paragraph of Article 2(1) are well-founded.
