Subject Matter

Supplements - Supplement to prospectuses: interim financial information

Question

Is the publication of interim financial statements considered as a significant new factor that requires the publication of a supplement in accordance with Article 23 of the Prospectus Regulation?

ESMA Answer

Original language

[ESMA31-62-1258 Prospectuses Q&A 8.1]

There is no systematic requirement to supplement the prospectus when interim financial statements are produced. This will depend on the circumstances of the case, in particular the relevance of the information included in the interim financial statements (such as any significant deviation in relation to previous financial information) or the type of securities to which the prospectus refers. In case of doubt ESMA recommends issuers to produce the supplement.
