Status: Published Answer Updated

Additional Information

Level 1 Regulation

Markets in Financial Instruments Regulation (MiFIR) Regulation (EU) No 600/2014-
Secondary Markets

Topic

Double volume cap

Additional Legal Reference

Regulation 2017/577- RTS on markets in financial instruments with regard to regulatory technical standards on the volume cap mechanism and the provision of information for the purposes of transparency and other calculations(RTS 3)

Subject Matter

DVC and corporate actions

Question

In case of a corporate action where a traded ISIN is replaced with a new ISIN, how will the new ISIN be treated for the purposes of the SVC?

ESMA Answer

10-10-2025

Original language

[ESMA 70-872942901-35 MiFIR transparency Q&A, Q&A 6.5]

In case of a corporate action, where a traded ISIN is replaced with a new ISIN, the new ISIN will be treated as a newly admitted to trading or newly traded financial instrument and the ESMA DVG SVC calculations and publication will not take the trading activity of the old ISIN into account.

In addition, while ESMA will publish the percentage of trading in this financial instrument carried out under the reference price waiver ~~and the negotiated transaction waiver~~ from the start of trading, suspensions following the breach of the thresholds set out under Article 5 of MiFIR should only be triggered when at least 12 months of data for the new ISIN is available.

ESMA is however reflecting on ways and means to ensure more continuity in the treatment of financial instruments subject to corporate actions and might decide to revisit this approach in the future.

English

In case of a corporate action, where a traded ISIN is replaced with a new ISIN, the new ISIN will be treated as a newly admitted to trading or newly traded financial instrument and the ESMA SVC calculations and publication will not take the trading activity of the old ISIN into account.

In addition, while ESMA will publish the percentage of trading in this financial instrument carried out under the reference price waiver from the start of trading, suspensions following the breach of the thresholds set out under Article 5 of MiFIR should only be triggered when at least 12 months of data for the new ISIN is available.

ESMA is however reflecting on ways and means to ensure more continuity in the treatment of financial instruments subject to corporate actions and might decide to revisit this approach in the future.
