Status: Answer Published

## Additional Information

---

### Level 1 Regulation

European Market Infrastructure Regulation (EMIR) Regulation (EU) No 648/2012- MDP

### Topic

\* EMIR Reporting

## Subject Matter

Reporting of accumulator contracts

### Question

(a) For the purpose of reporting under EMIR REFIT, how should OTC accumulator contracts – i.e., derivative contracts in which the buyer enters into an agreement to purchasing a predetermined number of underlying financial instruments at a predefined price, per day - over a specified 'accumulation' period, be classified?

(b) How should these contracts be reported under EMIR REFIT?

## ESMA Answer

---

24-05-2024

Original language

(a) Under EMIR REFIT, accumulators shall be classified as either forwards or options, depending on the presence of option features within these contracts. An accumulator contract without any embedded option features should be reported as a forward ('forward accumulator'), whereas accumulator contracts embedding one or more option features, should be reported as options accordingly.

(b) (i) Forward accumulators should be reported equivalently as forward contracts, as illustrated by the below example.

In the event that a knockout event is triggered, the counterparty should regard it as an early termination of the derivative. This scenario should be reported with Action Type 'Terminate' and Event Type 'Exercise'.

### Example 1:

Underlying Share: ABC Limited

Tenor: 12 months

Shares per day: 5,000

Accumulation days: Assuming 20 trading days per month (total accumulation days = 240)

Settlement date: Monthly

Forward Price: EUR 10\*

Maximum Notional Amount: EUR 12,000,000\*\*

Price of Underlying Share: Month 1 - EUR 11 / Month 2 - EUR 9.50

Report at inception

Reporting of accumulator contracts

| Table | Item | Field                  | Example    |

| 2                                                                                        | 59  | Notional amount in effect on associated effective date of leg 1 | 1,000,000*** |
| 2                                                                                        | 60  | Total notional quantity of leg 1                                | 12,000,000   |
| 2                                                                                        | 151 | Action type                                                     | NEWT         |
| 2                                                                                        | 152 | Event type                                                      | TRAD         |
| 2                                                                                        | 154 | Level                                                           | TCTN         |

\* Initial forward price should be populated in Field 2.48

**\*\* Maximum Notional Amount = maximum number of shares x forward price**

**Maximum number of shares = shares per day x maximum number of accumulation days**

**Maximum number of accumulation days = trading days x number of months within tenor**

**\*\*\* On assumption of 20 trading days per month and 5,000 shares per accumulation day.**

**In this example, we assume a gearing ratio of 1, in the calculation of the maximum number of shares and notional amount.**

**Modification after 3rd month execution**

**Reporting of accumulator contracts**

| 2                                                                                        | 58 | End date of the notional amount of leg 1                        | 31/03/2024   |

|     |     |                                                                 |            |
|-----|-----|-----------------------------------------------------------------|------------|
| 2   | 59  | Notional amount in effect on associated effective date of leg 1 | 950,000    |
| 2   | 60  | Total notional quantity of leg 1                                | 12,000,000 |
| ... | ... | ...                                                             | ...        |
| ... | ... | ...                                                             | ...        |
| 2   | 151 | Action type                                                     | MODI       |
| 2   | 152 | Event type                                                      | TRAD       |
| 2   | 154 | Level                                                           | TCTN       |

(ii) Option Accumulators should be reported as displayed below.

### Example 2:

Underlying Share: XYZ Limited

Tenor: 6 months

Shares per month: 1,000

Settlement date: Monthly

Option 1: Strike Price: EUR 100 (Expiry in 2 month)

Option 2: Strike Price: EUR 105 (Expiry in 6 months)

Total Notional Amount: EUR 620,000

*Month 1: Market price EUR 110. Buy 1,000 shares at strike – EUR 100 (option 1);*

*Month 2: Market price EUR 108. Buy 1,000 shares at strike – EUR 100 (option 1);*

*Month 3: Market Price EUR 106. Buy 1,000 shares at strike – EUR 105 (option 2);*

*And so forth, until expiry.*
