Register of information

## **Subject Matter**

Non-EU ICT service providers without a LEI - conflicting validation rules

### **Question**

When an ICT service provider reported under schedule 05.01 is a legal person outside of the EU, the absence of a EUID and LEI will result in a report validation error rendering the submission of the ROI impossible. Should such service provider be left out of the register or should a dummy EUID be used (preferably issued by ESA to adequately consolidate missing positions)
