Consultation paper on second set of implementing measures for directive on market abuse (Ref: CESR/03-102b)

CESR has published a consultation paper on its proposed advice to the European Commission on a second set of technical implementing measures for the Directive on Insider Dealing and Market Manipulation (Market Abuse).

Due to little competence in this area, the Consumer Council in Norway cannot give meaningful input on the second set of implementing measures for directive on market abuse. However, we are positive to transparency and trust in the market, and see this as a premise for the market to function well.

Sincerely yours,

Jan Schrøder
head of section

Hilde Myhre
advisor
