Collection Description

SFTR - Inter TR data exchange 2023 ([link](#))

Usage Guideline Description

auth.080.001.02_ESMAUG_1.1.0 ([link](#))

The SecuritesFinancingReportingReconciliationStatusAdvice message is sent by the trade repositories (TRs)) to other TR and to the competent authority (CA) or made available to the report submitting entity and the reporting counterparty as well as the entity responsible for reporting, if applicable, to provide a status advice for reconciliation.

Outline

In the Collection SFTR - Inter TR data exchange 2023, the message auth.080.001.02_ESMAUG_1.1.0 is composed of a mandatory Business Application Header V01 (head.001.001.01) and a Document.

Business Application Header V01 (head.001.001.01)

The Business Application Header V01 (head.001.001.01) is composed of 13 elements.

a - Character Set

Contains the character set of the text-based elements used in the Business Message.

b - From

The sending MessagingEndpoint that has created this Business Message for the receiving MessagingEndpoint that will process this Business Message.

Note the sending MessagingEndpoint might be different from the sending address potentially contained in the transport header (as defined in the transport layer).

c - To

The MessagingEndpoint designated by the sending MessagingEndpoint to be the recipient who will ultimately process this Business Message.

Note the receiving MessagingEndpoint might be different from the receiving address potentially contained in the transport header (as defined in the transport layer).

d - Business Message Identifier

Unambiguously identifies the Business Message to the MessagingEndpoint that has created the Business Message.

e - Message Definition Identifier

Contains the MessageIdentifier that defines the BusinessMessage.
It must contain a MessageIdentifier published on the ISO 20022 website.

example camt.001.001.03.

f - Business Service

Specifies the business service agreed between the two MessagingEndpoints under which rules this Business Message is exchanged.

To be used when there is a choice of processing services or processing service levels.

Example: E&I.

g - Creation Date

Date and time when this Business Message (header) was created.

Note Times must be normalized, using the "Z" annotation.

h - Copy Duplicate

Indicates whether the message is a Copy, a Duplicate or a copy of a duplicate of a previously sent ISO 20022 Message.

i - Possible Duplicate

Flag indicating if the Business Message exchanged between the MessagingEndpoints is possibly a duplicate.

If the receiving MessagingEndpoint did not receive the original, then this Business Message should be processed as if it were the original.

If the receiving MessagingEndpoint did receive the original, then it should perform necessary actions to avoid processing this Business Message again.

This will guarantee business idempotent behaviour.

NOTE: this is named "PossResend" in FIX - this is an application level resend not a network level retransmission.

j - Priority

Relative indication of the processing precedence of the message over a (set of) Business Messages with assigned priorities.

k - Signature
