Introduction

Under Action 10 of the Action Plan 'Financing Sustainable Growth' [1], the European Commission has invited [2] the three European Supervisory Authorities (ESAs) to each develop a report presenting evidence and possible advice on potential undue short-termism. Short-termism can be defined as "the focus on short time horizons by both corporate managers and financial markets, prioritising near-term shareholder interests over long-term growth of the firm"[3].

The Commission's mandate indicates that decisions taken by corporations do not fully reflect long-term aspects that would be required to put the EU economy on a sustainable path and manage the transition towards a low carbon economy. In particular, as a result of short-term market pressures, some companies may under-invest in long-term value drivers such as innovation and human capital and overlook environmental and social objectives that require a long-term orientation. Consequently, sustainability faces obstacles to develop in a context where incentives, market pressures and prevailing company culture prompt market participants to focus on near-term performance at the expense of mid- to long-term objectives.

Following an initial analysis based on desk research and preliminary quantitative evidence, ESMA has identified six areas which it considers relevant to examine in relation to the Commission's mandate.

These areas are:

- Investment strategy and investment horizon;
- Disclosure of Environmental, Social and Governance (ESG) factors and the contribution of such disclosure to long-term investment strategies;
- The role of fair value in better investment decision-making;
- Institutional investors' engagement;
- Remuneration of fund managers and corporate executives;
- and Use of CDS by investment funds

ESMA is not claiming there is a causal relationship between the abovementioned areas and short-termism; it is rather seeking the views of stakeholders on these areas in order to better understand their interaction with short-termism. As such, responses to this survey will contribute to ESMA's analysis of potential sources of undue short-termism on corporations stemming from the financial sector in the areas of focus. Additionally, responses to the survey will back the identification of any other areas in which short-term behaviour is problematic and where the regulatory rules exasperate (or mitigate) short-term pressures.

Overall, with this survey ESMA is seeking to collect information on market practices and the views of financial market participants. By responding to the questionnaire, market participants will contribute to ESMA's advice to the Commission and as such help shape future policy decisions in relation to short-termism in the financial sector.

- [1] European Commission Action Plan Financing Sustainable Growth.
- [2] Call for advice to the European Supervisory Authorities to collect evidence of undue short-term pressure from the financial sector on corporations.
- [3] Definition of short-termism provided in the second paragraph of section 1 of the Commission's mandate (Mason, 2015).

Structure of the questionnaire

Section I: General information about respondent

The first section of the questionnaire contains questions which will help ESMA understand respondents' profile and whether they agree for their response to the questionnaire to be published on ESMA's website.

All respondents are invited to respond to the questions in this section.

Section II: Investment strategy and investment horizon

In this section of the questionnaire, ESMA invites respondents to provide information on the key features and the focus of their investment strategy as well as on the time horizon(s) they use in their business activities. The questions aim to collect comprehensive information on the strategic approach taken by various market players, depending on their role and objectives, in order to get a broad understanding of how they prioritise short- and long-term values in their investment activities. The responses to the questions in this section are intended to provide evidence on how consistent the long-term value drivers of the investment strategy are with the investment timeframe and the global approach for investment decision-

making, and which specific considerations in investment strategies may induce short-termism.

The section is open to all respondents as it seeks information on the interaction between short-termism and general business activities. The questions relating to portfolio holdings are addressed to asset owners and asset managers.

Section III: Disclosure on ESG factors and the contribution of such disclosure to long-term investment strategies

The context for the questions in this section is the EU's 2014 adoption of the Non-Financial Reporting Directive (hereafter 'NFRD') in order to enhance the consistency and comparability of non-financial information disclosed throughout the Union. The NFRD requires large EU companies to disclose information on matters relating to the environment, social and employee aspects, respect for human rights, anti-corruption and bribery issues in an annual non-financial statement to be presented either in the management report or in a separate document.[1]

The NFRD came into force in 2014 for reporting on the financial year starting on 1 January 2017 or during the calendar year 2017, which means that two waves of mandatory non-financial information have now been published in most jurisdictions. Section III of the questionnaire collects information on the experience of market participants with these first two disclosure waves by asking whether, how and to what extent public disclosure on ESG factors, which complements traditional financial disclosure by listed companies, can enable investors to integrate in their decision-making process considerations on a company's current and future ability to create long-term sustainable value for its shareholders and for the society at large. Furthermore, this section raises the question whether any changes relating to requirements on non-financial information are needed at European level to enable investors to take long-term investment decisions.

The questions in this section are primarily addressed to institutional and retail investors that make use of information in issuers' public reporting in their investment decisions, as well as to issuers that provide such ESG related information to investors.

[1] Additionally, the forthcoming Regulation of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector (2018/0179(COD)) will require financial advisers to publish information on their policies on the integration of sustainability risks in their investment advice or insurance advice. However, as this Regulation has not yet entered into force and will not be applicable until 15 months after entry into force, it is not possible at this stage to assess its impact, and it is as such not covered in the questionnaire.

Section IV: The role of fair value in better investment decision-making

In this section of the questionnaire, ESMA seeks to collect further information related to the following statement from the report [1] of the High Level Expert Group (hereafter 'HLEG'): "there is considerable disagreement among interested parties on the appropriate accounting treatment for long-term investments, in particular on whether long-term assets on investors' balance sheets should be valued based on the currently prevailing (daily) market prices – also known as 'mark-to-market' valuation or 'fair value' accounting [...] The debate is mainly around equity, equity-type and listed credit instruments on the balance sheets of long-term investors, such as non-financial corporations, insurance companies and banks."

The section contains questions on whether and how fair value may impact the capacity of financial reporting to provide relevant and reliable information on equity instruments held for long-term investment purposes. Responses in this area will help ESMA to assess how the measurement and disclosure of fair value may impact the selection of a short- or long-term horizon, as well as to assess whether the transparency benefits arising from the use of fair value for financial instruments, particularly equity instruments, outweigh the intrinsic potential volatility of fair value. Furthermore, whilst Level 1 fair value measurement is based on quoted prices in active markets and, as such, it has a high degree of reliability, ESMA is also interested in exploring the usefulness of Level 2 and Level 3 fair value measurements [2] and the extent to which investors are willing to take these fair value measurements into consideration in their long-term investment decisions.

The European Commission has issued two requests for advice to the European Financial Reporting Advisory Group (EFRAG) to assess the impact of IFRS 9 Financial Instruments on equity investments and to investigate potential alternatives to fair value accounting for equity and equity-type instruments held for the long-term. ESMA closely monitors and contributes to EFRAG's work in this area [3]. In section IV of the questionnaire ESMA investigates more specifically the reasons underlying any connection between fair value accounting and the emergence of short-term pressures in the investment practice of issuers.

The questions in this section are primarily addressed to institutional and retail investors that make use of information in issuers' financial statements in their investment decisions, as well as to issuers that prepare financial statements.

- [1] https://ec.europa.eu/info/sites/info/files/180131-sustainable-finance-final-report_en.pdf
- [2] Inputs to Level 2 fair value measurements are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Inputs to Level 3 fair value measurements are unobservable inputs for the asset or liability.
- [3] http://www.efrag.org/News/Public-183/New-EFRAG-consultation-on-Equity-Instruments--Research-on-Measurement

Section V: Institutional investors' engagement

In this section, ESMA invites institutional investors to share their experiences and views on whether and how they monitor the long-term value maximisation of their investee companies by further engaging with them and voicing their potential concerns. The questions of this section indirectly relate to the revised Shareholder Rights Directive that established specific requirements in order to encourage shareholder engagement in EU listed companies. ESMA acknowledges that the Directive has entered into application only recently. In this section ESMA seeks to collect information on how engagement activities are put in place at the time of the publication of the questionnaire based on the current regulatory framework in the relevant Member States.

For the purposes of this questionnaire, engagement is defined as any monitoring and interaction by institutional investors with investee companies, including the exercise of voting rights and other activities to influence the investee company such as activist strategies.

The questions in this section are primarily addressed to institutional investors.

Section VI: Remuneration of fund managers and corporate executives

In this section, ESMA examines whether remuneration policy and practices of fund managers can be a driver of short-termism. Stakeholder feedback in this regard will provide further evidence in relation to the statements of the HLEG report about the "frequent separation of the behaviour of some financial intermediaries from the preferences of the ultimate beneficiaries" and that "job tenure and financial rewards for analysts, asset/money managers and traders" can be heavily dependent on short-term returns.

The questions in part A of this section are addressed to UCITS management companies, AIFMs, and self-managed UCITS investment companies and AIFs as they relate to how remuneration practices impact investment behaviour of asset managers vis-à-vis the funds they manage and the investors in such funds. The questions are particularly related to the requirements arising from the UCITS Directive [1], AIFMD [2], the Guidelines on sound remuneration practices under the UCITS Directive [3] and the Guidelines on sound remuneration practices under the AIFMD [4].

The questions in part B of this section are primarily addressed to issuers with reference to the remuneration packages assigned to their executives. Evidence on this aspect is expected to provide an indication of how executives' incentives to pursue long-term vs. short-term performance can be skewed by the way their remuneration package is designed.

In addition, each section invites all stakeholders to comment on the potential contribution to short-termism from remuneration practices for fund managers or corporate executives.

- [1] Directive 2009/65/EC
- [2] Directive 2011/61/EU
- [3] ESMA/2016/575
- [4] ESMA/2013/232

Section VII: Use of CDS by investment funds

Building on the work already conducted by ESMA [1] looking at the prevalence of sell-only or net sell Credit Default Swaps (CDS) positions held by UCITS funds, this section of the questionnaire aims to collect information on the use of CDS by all investment funds. The existing evidence shows some use of sell only or net sell holdings of CDS and ESMA would like to explore this topic further in the context of short-termism. ESMA will use the information it collects from stakeholders to assess whether the use of such instruments could be one of the potential drivers of short-termism.

Sell-only or net sell CDS positions may indicate increased short-term risk taking by funds in order to generate short-term profits, thereby diverting funds from investment in the real economy and indirectly contributing to a short-term profit taking approach. This is why ESMA would like to explore this area by gathering evidence from stakeholders, particularly regarding the reasons for sell only or net sell holdings of CDS positions, and how the tail risk of CDS is managed. ESMA recognises that there may be other categories of derivatives that may also merit attention, so one of the questions allows respondents to comment on other products as well.

The questions in this section of the questionnaire are addressed to UCITS management companies, self-managed UCITS investment companies and AIFMs.

[1] (see "Drivers of CDS usage by EU investment funds" in Trends, Risks and Vulnerabilities Report No.2 from 2018)

Section VIII: Final

The last section of the questionnaire gives respondents the chance to raise any additional considerations on the topic of undue short-term pressure on corporations from the financial sector which they have not been able to reflect elsewhere in the survey.

All respondents are invited to respond to this part of the questionnaire.

How to respond

Deadline

ESMA will consider all responses received by 29 July 2019

Technical instructions

The questionnaire is presented in EUSurvey which is the European Commission's online survey making tool.

In order to access the questionnaire, please click on the following link: https://ec.europa.eu/eusurvey/runner/ /ESMA-SUS-2019

When you click on the link, EUSurvey will open in your default browser and you will see the questionnaire. Before starting to fill in the questionnaire, we encourage you to read through all questions.

As you go through the questionnaire and fill in your responses, additional questions will sometimes appear. Such additional questions are based on your response to a previous question and are intended to collect further information about the response you have provided. However, unless specifically mentioned, you are invited to respond to all questions.

The full set of responses is submitted by clicking the "Submit" button at the end of the questionnaire. Upon submission, the system will offer you to print or download your responses for your own reference.

For any questions regarding the questionnaire, please send an email to short.termism@esma.europa.eu

Publication of responses

All contributions received will be published following the close of the survey, unless you request otherwise. Please clearly indicate under question [6] if you do not wish your contribution to be publicly disclosed. A standard confidentiality statement in an email message will not be treated as a request for non-disclosure. A confidential response may be requested from us in accordance with ESMA's rules on access to documents. We may consult you if we receive such a request. Any decision we make not to disclose the response is reviewable by ESMA's Board of Appeal and the European Ombudsman.

Data protection

Information on data protection can be found at www.esma.europa.eu under the heading 'Data protection'.

Definitions, abbreviations, and legal references

CDS

Credit Default Swaps

Corporate executives

Top managers, such as the Chair or the CEO, and/or members of the board of directors.

Engagement

For the purpose of this questionnaire, any monitoring and interaction by institutional investors with investee companies, including the exercise of voting rights and other activities to influence the investee company such as activist strategies

ESG

Environmental, Social and Governance

Fair value

The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (IFRS 13)

HLEG

High Level Expert Group

Holding period

For the purpose of this questionnaire, 'holding period' is defined as the elapsed time between the initial date of purchase and the date on which the investment is sold or matured if held to maturity.

Identified Staff

Categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls into the remuneration bracket of senior management and risk takers, whose professional activities have a material impact on the management company's risk profile or the risk profiles of the UCITS that it manages and categories of staff of the entity(ies) to which investment management activities have been delegated by the management company, whose professional activities have a material impact on the risk profiles of the UCITS that the management corporate manages.

Institutional investors

Asset owners or asset managers acting on their behalf

Long-term investment / value

For the purpose of this questonnaire, please consider these expressions in the context set out in the Commission's mandate on undue short-termism and in the European Commission's Action Plan 'Financing Sustainable Growth'.

Non-Financial Reporting Directive / NFRD

Directive 2014/95/EU of the European Parliament and of the Council of 22 October 2014 amending Directive 2013/34/EU as regards disclosure of non-financial and diversity information by certain large undertakings and groups

Revised Shareholder Rights Directive

Directive (EU) 2017/828 of the European Parliament and of the Council of 17 May 2017 amending Directive 2007/36/EC as regards the encouragement of long-term shareholder engagement

Short-termism

The focus on short time horizons by both corporate managers and financial markets, prioritising near-term shareholder interests over long-term growth of the firm

I. General information about respondent

I wish my response to be published

Please note that the questionnaire should be read in conjunction with the explanatory note, definitions and

istructions. It you have not already read the explanatory note, please do so before you start tilling in your esponses.
Name of the company / organisation
1400 character(s) maximum
NLB Asset Management, d.o.o.
Type of respondent
UCITS management company
Industry
Financials
Are you representing an association?
YesNo
Country
Slovenia
Please indicate if wish to have your response published on the ESMA website I do not wish my response to be published

8

7. This questionnaire considers long-term investment in the framework of sustainable finance, under the
assumption that long-term investment projects should be consistent with the objective of supporting the
shift towards a more sustainable financial and economic system. In this context, for the purpose of filling in
this questionnaire, what timeframe would you consider when defining long-term investment?

-		
0000	\circ	
6	イーウ	vears

- 6-10 years
- 11-30 years
- +30 years
- Other

1400 character(s) maximum

Up to 1 year _ short term; 1-5 years - mid term. Also tax aystem in Slovenia has first tax rate bracket defined as "up to 5 years". We would otherwise define long term as 6+ years (not up to 10), but the answer is not available.

II. Investment strategy and investment horizon

Click here for the list of definitions, abbreviations and legal references included in the Explanatory Note

8. Which time horizon do you apply in your general business activities?

Please tick one time horizon per category

	Less than 1 year	1-4 years	5-8 years	9-12 years	More than 12 years	Not applicable
Overall	0	0	•	0	0	0
- Business strategy	0	0	•	0	0	0
- Profitability	0	0	•	0	0	0
- Funding	0	0	•	0	0	0
- Investment	0	0	•	0	0	0
- Trading	0	•	0	0	0	0
- Other	0	0	0	0	0	•

9. In your experience, to which extent do the following nodes in the investment value chain contribute to the tendency towards short-termism?

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
Retail investors	0	0	•	0	0

Asset owners (i.e. giving the investment mandate either on their own account or on the account of retail investors)	0	0	©	©	•
Asset managers (i.e. those in charge of fulfilling the mandate of asset owners)	0	0	0	•	0
Top management of listed issuers	0	0	0	0	•
Sell-side analysts	0	0	0	0	0
Other	0	0	0	•	0

2800 character(s) maximum

Based on almost 20 years experience in the industry, empirical evidence clearly shows that Asset owners react despite their investment mandates much more to short term volatility (recessions) than retail investors, followed by Asset Managers. We have given "Other" grade 4, but that is so because it includes Media and Politicians/Regulators (which are both 5 max in term of short-termism) on one hand and Academics (which would be graded 1 or 2).

* Please mention any other nodes of the investment value chain that you believe are affected by the tendency towards short-termism and indicate the extent to which they are affected between 1 (Not at all) and 5 (To a great extent)

1400 character(s) maximum

At least some financial advisors live off entry fees and other one-off charges so they contribute to short-termism significantly (grade 5). If they are paid through e.g. retrocession of management fees, than their behavior is strikingly different (grade 2).

10. To which extent does each of the following factors result in short-termism by your institution?

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
Macroeconomic environment	0	•	0	0	•
Prudential regulation	0	0	0	•	0
Market pressures	0	•	0	0	0
Profitability	•	0	0	0	0
Shareholders' interest	•	0	0	0	0
Business objectives	0	•	0	0	0
Competitive pressure	0	•	0	0	0
Client demand	0	0	0	•	0

Company reporting requirements	0	•	0	0	0
Executive remuneration structure	•	•	•	•	•
Other	0	0	•	0	0

2800 character(s) maximum

The single largest determinant to short-termism by asset management companies is Client demand in times of panic, multiplied by structure of investors - the more of them institutional and asset owners, the relatively larger withdrawals and hence short term trading reactions.

* Please mention the other factor(s) that may result in short-termism by your institution and indicate their relevance between 1 (Not at all) and 5 (To a great extent)

1400 character(s) maximum

Also remuneration structure for portfolio managers which is stronger towards shorttermism than executive remuneration.

11. What is the actual holding period prevailing in your investment strategy?

Please respond on a best-effort basis and tick one holding period per category of securities

	Less than 1 year	1-4 years	5-8 years	9-12 years	More than 12 years	Not applicable
Equity	0	0	•	0	0	0
Bonds	0	0	•	0	0	0
Other	•	0	0	0	0	0

* Please mention the other categories of securities which you invest in and indicate the holding period you generally apply

1400 character(s) maximum

It is mostly money market instruments, so by definition less than 1 year.

12. To which extent does each of the following factors drive the actual holding period prevailing in your investment strategy?

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
Profitability	0	0	•	0	0

Shareholders' interest	0	•	0	0	0
Competitive pressure	0	0	0	•	0
Client demand	0	0	•	0	0
Remuneration practices in the financial sector	•	0	0	0	0
Economic activities	0	•	0	0	0
ESG	0	•	0	0	0
Monetary policies / macroeconomic factors	0	0	0	•	0
Non-prudential regulation (e.g. tax regulation)	0	0	0	•	0
Prudential regulation	0	0	•	0	©
Company reporting requirements (any type of disclosure)	•	0	0	0	0
Other	0	0	0	0	0

2800 character(s) maximum

The key to holding period is general are factors related to competitive advantage of companies, especially competitive pressure, and factors affecting all industries, such as taxation and monetary policy.

13. On a best-effort basis, in the next 2 years, how do you expect the average holding period of the following portfolios to evolve?

Please tick one holding period per category of assets

	Increasing by less than 6 months	Increasing by 6- 12 months	Increasing by more than 12 months	No (notable) change	Decreasing by less than 6 months	Decreasing by 6-12 months	Decreasing by more than 12 months
Equities	0	0	0	•	0	0	©
Fixed Income	0	0	0	•	0	0	0
Other	0	0	0	0	0	0	0

Again, money market instruments.					
To which extent will the expected extriven by each of the following factor Equities		ne average ho	ding period, ir	ndicated under	question
	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To grea exte
* Profitability	0	0	0	•	0
* Shareholders' interest	0	•	0	0	0
* Competitive pressure	0	0	0	0	•
* Client demand	0	0	•	0	0
* Remuneration practices in the financial sector	•	0	0	0	0
* Economic activities	0	0	•	0	0
* ESG	0	•	0	0	0
* Monetary policies / macroeconomic factors	0	©	0	•	0
* Non-prudential regulation (e.g. tax regulation)	0	0	0	0	•
* Prudential regulation	0	0	•	0	0
* Company reporting requirements (any type of disclosure)	0	•	0	0	0
* Other	0	•	0	0	0

* Please provide any relevant information supporting your expectations

Our investment policies are written and we do not plan to amend them within next 2 years.

1400 character(s) maximum

	1: Not at all	2: To a small extent	3: To some extent	4: To a large extent	5: To a great extent
* Profitability	0	0	•	0	0
* Shareholders' interest	0	•	0	0	0
* Competitive pressure	0	0	•	0	0
* Client demand	0	0	•	0	0
* Remuneration practices in the financial sector	•	0	0	0	0
* Economic activities	0	0	•	0	0
* ESG	0	0	0	0	0
* Monetary policies / macroeconomic factors	0	0	0	0	•
* Non-prudential regulation (e.g. tax regulation)	0	0	0	•	0
* Prudential regulation	0	0	•	0	0
* Company reporting requirements (any type of disclosure)	0	0	•	0	0
* Other	0	•	0	0	0

* Please explain your response and, if necessary, indicate any other types of securities you hold and the factors which drive your holding period for those securities

2800 character(s) maximum

For fixed income, the key driver is monetary policy, and the other really significant factor is taxation, especially relative to bank deposits as the major vehicle of retail savings.

* Please mention any other factors which you believe will imply a change in the average holding period for your equity and / or bonds and indicate their relevance between 1 (Not at all) and 5 (To a great extent)

1400 character(s) maximum

With general prohibition of retrocession fees to independent advisors, we expect short termism to rise as there is less incentive for long-term relationships.

III. Disclosures on ESG factors and their contribution to long-term investment strategies

Click here for the list of definitions, abbreviations and legal references included in the Explanatory Note

- 15. Based on your experience, please indicate to which extent you agree with the following statement: "Disclosure of ESG information by listed companies enables investors to take long-term investment decisions".
 - 1: Totally disagree
 - 2: Mostly disagree
 - 3: Partially disagree and partially agree
 - 4: Mostly agree
 - 5: Totally agree
- * 16. Assuming that investors are willing to consider ESG disclosure in their decision-making process, why does disclosure of ESG information by listed companies not enable investors to take long-term investment decisions?

Please respond by selecting one or several items in the list below

- Lack of sufficient independent assurance on the provided ESG disclosure
- Lack of quantitative evidence regarding how the listed company contributes to national or international sustainability targets
- Lack of consistency between the disclosed ESG policies and evidence of the listed company's actions
- Lack of sufficiently forward-looking disclosure on ESG risks and opportunities
- Lack of comparability between different listed companies' disclosure due to the NFRD's disclosure requirements not being sufficiently detailed and allowing for the use of various disclosure frameworks
- Lack of a clear link between ESG matters and the current and future performance of the listed company
- Lack of an integrated presentation and analysis of financial and non-financial performance
- Lack of information on the disclosure framework(s) which listed companies use
- Lack of an explicit statement indicating that the listed company's Board of Directors takes responsibility for the relevance, accuracy and completeness of the ESG disclosure provided
- Lack of access to / availability of ESG disclosure in data aggregators or other source data providers
- Lack of sufficient knowledge by investors on how to incorporate ESG disclosure into their decision-making process
- None of the above, non-financial information is not material to the investment decision
- Other

* Please specify

1400 character(s) maximum

It is already included e.g. in tax breaks for companies involved in e.g. R&D or into additional pensions payment in Slovenia

19. In your view, would requiring specific disclosures on intangible assets which are not accounted for in the financial statements enable long-term investment decisions?

	Yes
•	No
ease	ехр
1400) cha

1400 character(s) maximum

The assymetry of information betweent the company (its Board) and investors is just too large for such information to be fully trusted by investors to be relevant.

20. The NFRD gives companies flexibility to disclose non-financial information to the extent necessary for an understanding of the undertaking's development, performance, position and the impact of its activity in relation to non-financial matters. Do you consider that further requirements are needed to increase the level of detail in the disclosure requirements regarding non-financial information?

Yes

No

* Please explain your response

1400 character(s) maximum

Already financial statements are way overloaded with various and different information which is not really essential for portfolio investors. Furthermore, holding a diversified portfolio an investor can also assume that also ESG benefits and costs get diversified away because ESG compliance is not a linear factor. So even if it is sound to follow ESG guidelines on a specific investment it is not really sound to follow it on a portfolio of investments as any conceivable ESG positives will certainly be diversified away.

21. Do you consider that further steps in the area of non-financial reporting are needed at the national or the European level to enable investors to take long-term investment decisions?

Yes

No

* Please explain your response

1400 character(s) maximum

Again, there is already too much information. It would be much more useful to just have financial information audited by institutions not paid by the company/its shareholders because this is the true conflict of interest. Also ESG lacks a clear definition, so it cannot really be audited.

IV. The role of fair value in better investment decision-making

Click here for the list of definitions, abbreviations and legal references included in the Explanatory Note

22. Based on your experience, please indicate to which extent you agree with the following statement: "For the purpose of undertaking an internal assessment of the performance of long-term investments held in equity instruments, fair value provides a company's management with relevant information in order to better understand the short-term and the long-term consequences of the investments held"

1: Totally disagree

2: Mostly disagree

	4: Mostly agree5: Totally agree
	ase explain your response and provide evidence, where available 400 character(s) maximum
	To think that managers can be better at valuation than market consensus (=price) is a longshot position. Usually the motive to use something else than fair value is to either store some profits for lean years or to hide losses, but it is mostly related to reporting, not to management information.
the helo	Based on your experience, please indicate to which extent you agree with the following statement: "For purpose of enabling an external analyst or investor to assess the performance of long-term investments in equity instruments by a company, fair value provides relevant information in order to better erstand the short-term and the long-term consequences of the investments"
(1: Totally disagree
(2: Mostly disagree
(3: Partially disagree and partially agree
	4: Mostly agree5: Totally agree

14	400 character(s) maximum
	Not having a fair value accounting presents outside investors with a huge task of adjusting from any accounting value to fair value when evaluating the company.
disc [1] U	Is the current accounting treatment for equity instruments under IFRS 9 [1] a decisive factor in couraging a company from undertaking new long-term investments in equities? Index IFRS 9 Financial Instruments equity instruments are accounted for at fair value with the possibility to exclude fair value changes the statement of profit or loss Yes No
ava	ase explain your response, including whether you already apply IFRS 9, and provide evidence where ilable
14	400 character(s) maximum
	We do not apply IFRS 9, as we manage mutual funds, which are full-fair-value financial vehicles.
dive	Is the current accounting treatment for equity instruments under IFRS 9 [1] a decisive factor in triggering estment by a company of existing equity holdings elected for the long-term? Index IFRS 9 Financial Instruments equity instruments are accounted for at fair value with the possibility to exclude fair value changes the statement of profit or loss Yes

No

* Please explain your response, including whether you already apply IFRS 9, and provide evider available	nce where
1400 character(s) maximum	
Other motives to invest or divest are much much more important than short term accounting trea	tment.
26. In your view, what are the factors that may impact the relevance to users of financial stater	nents of fai

You may choose more than one factor

Volatility in reported earn

value measurements for long-term investments?

- Measurement errors (in Level 2 or 3 Fair Value)
- Complexity of calculations (in Level 2 or 3 Fair Value)
- Management's opportunistic behaviour (in Level 2 or 3 Fair Value)
- Insufficient involvement of independent third-party assessment (in Level 2 or 3 Fair Value)
- Limited relationship with the expected developments of fair value in the long-term
- Other

V. Institutional investors' engagement

Click here for the list of definitions, abbreviations and legal references included in the Explanatory Note

- 27. Is your investment strategy predominantly active or passive?
 - Active
 - Passive
- * Predominantly long-term or short-term?
 - Short-Term
 - Long-Term
- * Please explain your response also in connection with the investment time horizon you have indicated under question 8

2800 character(s) maximum

It is active because every holding and divestment is based on an in-house analysis. Minimum holding period in general is 2 years, with a much longer expected holding period.

Additionally, to be a passive investor you are passive to some benchmark. So it is not really an invesment strategy - it is only mirroring.

Please respond to the remainder of this section based on (i) the investment strategy you have indicated under question 27 and (ii) the investment time horizon you have indicated under question 8

28. Please elaborate on how the actual holding period of your investments (as you have indicated under question 11) matches with your investment mandate

14	400 character(s) maximum
	On average, it is about the same.

	2: To a small extent
	3: To some extent
	4: To a large extent
	5: To a great extent
	ase explain why long-term value considerations do not play a major role 400 character(s) maximum
	We do not differentiate between long and short term value as it is equal.
eng	To which extent does your firm integrate long-term value considerations for the purpose of setting its gagement policy (and subsequent engagement activities)? 1: Not at all 2: To a small extent 3: To some extent 4: To a large extent 5: To a great extent
und Ple	How does your firm engage with the investee companies in order to mitigate any potential sources of due short-termism? ease select one or several options from the below list Voting at the Annual General Meeting (AGM) Private engagement (bilateral meetings, conference calls, etc.) Collective engagement initiatives (coalitions, engagement platforms, etc.) Litigation (or a threat to use litigation as a negotiating tool) Other
USE	case you selected more than one option in Question 31, please explain how you select different tools and for engagement 800 character(s) maximum

*32. What are the main topics your firm engages on in order to mitigate any potential sources of undue short-termism?

Remuneration of directors
Board appointments (including board diversity, independence, tenure)
Related party transactions
Pay-out policy (dividends, share buybacks, etc.)
ESG / sustainability-related
Other
*33. To which extent does your firm rely on proxy advisors for the purpose of deciding how to vote in order to mitigate any potential sources of undue short-termism?
1: Not at all
2: To a small extent
3: To some extent
4: To a large extent
5: To a great extent
* Please explain why and indicate whether you have your own engagement team and, if you do, its size 1400 character(s) maximum
Based on our firm's policies, we have certain thresholds when it is sound to engage in AGM's and portfolio
managers produce voting proposals for such relevant holdings.
24. Places indicate your agreement with the following statement: "Drayy advisors take into consideration
34. Please indicate your agreement with the following statement: "Proxy advisors take into consideration long-term value when they provide voting advice"
1: Totally disagree
2: Mostly disagree
3: Partially disagree and partially agree
4: Mostly agree
5: Totally agree
* Please provide quantitative or anecdotal evidence to corroborate your response
1400 character(s) maximum
As the majority of advisors, they offer advice that is likely to be well received by the entity that hired them. Long term value may or may not be such thing. Furthermore, as they influence votng outcome at AGM's, their role creates huge conflicts of interest as they may also be in business with other owners and even the company managers and supervisors.
35. Please indicate your agreement with the following statement: "Engagement activities can be an efficient way of mitigating any potential sources of undue short -termism" 1: Totally disagree 2: Mostly disagree 3: Partially disagree and partially agree 4: Mostly agree 5: Totally agree

* Please provide quantitative or anecdotal evidence to corroborate your answer

You may choose more than one factor

Company managers and many institutional owners frequently overreact so it is useful to challenge them at least once annually; however, being a mutual fund manager and being prohibited from active ownership it is rarely successful.

- 36. To which extent do you consider your engagement activities successful in mitigating any potential sources of undue short-termism?
 - 1: Not at all
 - 2: To a small extent
 - 3: To some extent
 - 4: To a large extent
 - 5: To a great extent
- * Please provide quantitative or anecdotal evidence to corroborate your answer.

1400 character(s) maximum

Sometimes proposals against reduced dividend or for a higher dividend have been passed at AGM.

37. Which are the main obstacles that institutional investors face when engaging with investee companies, and how could they be addressed in your view?

2800 character(s) maximum

Quality and conflicts of supervisors are most important agency issues, and with institutional investors, they also have their own similar problems, so in general it usually leads either to overly aggressive or overly conservative behavior of investee companies.

- 38.Please indicate your agreement with the following statement: "The recent entry into application of the revised Shareholder Rights Directive is going to increase the extent to which your firm takes into account long-term value considerations for the purpose of setting your investment strategy and engagement policy"
 - 1: Totally disagree
 - 2: Mostly disagree
 - 3: Partially disagree and partially agree
 - 4: Mostly agree
 - 5: Totally agree
- * Please elaborate and explain which regulatory improvements could be considered, if any

2800 character(s) maximum

The firm's value is not derived from shareholders rights and most of the issues it deals with are non-material with this respect. Critical issues are multiple share classes and especially the quality and independence of supervisors, also and especially representatives of employee's.

VI. Remuneration of fund managers

Part A: Remuneration of identified staff in funds

39. What is the average investment horizon of the funds managed by your firm?
