

INTRODUCTION

Onyze Digital Assets S.L. (“Onyze”) response to ESMA's 3rd package Public Consultation on the Technical Standards of the specifying certain requirements of MiCA.

Onyze remains committed to expanding its business within the regulatory perimeter of the EU, having obtained registration as a Virtual Asset Service Provider (VASP) with the Bank of Spain on the 30/03/2022. We are seeking to obtain further registrations and licenses in other Member States as appropriate when needed.

Founded over 4 years ago, Onyze is one of the main digital asset custody platforms in Spain. Onyze provides products and services to institutional clients that enable them to create value to either their operating infrastructure as well as in the offering of new financial products to their end customers. Onyze product and services offering include, but are not limited to, infrastructure provider services, crypto asset custody and exchange services as well as compliance support services subject to local regulatory requirements.

Onyze supports the MiCA regulation as it provides legal clarity, including a clear path to licensing, and will enable the growth of our business in the EU region taking an approach that protects customers while establishing confidence in the market.

In this regard, Onyze appreciates the opportunity to comment on some of the ESMA's consultation queries.

We will be happy to discuss any points or questions raised in greater detail at compliance@onyze.com
